Crossley and Dan

Whenever you guys are chasing gremlins out of the system if you have time to let us know I most definitely want to get my team involved. Trystan is the Comms/Sigs team lead so if you can let him know and he can let you know who and if we can make it over. We have some other inspections/training already scheduled, so there might be a few times we can't make it out.

Thanks

Dean.

Subject: RE: CCTV troubleshooting

Hello Eloy

I am ok with rescheduling this for next week if it is fine with Hisham. I would like to get to this as quickly as we can so I will propose Monday if that works with you. As for the stations, I need to get a complete list of the cameras that don't work but if you have the time I would like to go to the eastern 7 stations and bang out all the devices that have since gone offline.

Hisham are you able to wait till Monday (or someday next week) for these affected cameras?

Regards

Crossley Denison, B. Eng, E.I.T

Subject: CCTV troubleshooting

Hi Crossley,

As we discussed today, we would be interested in the CCTV troubleshooting. I'd hope we can schedule it for next week if it works for you since tomorrow we have some activities planned. Also, please let us know which stations you plan on visiting.

Thanks you for inviting us. This is a great opportunity to have a small troubleshooting exercise with cameras.

We are looking forward to it.

Best Regards,

Eloy Fernandez
