 Richard,

These parts are to be used to address CC Defects. My request was not for Alstom to identify the scope of work to be performed, but to ensure that the parts taken from Alstom inventory are tracked so that they can be replenished.

Please coordinate with Steve Nadon's team to hand over the parts. Should any of the parts not end up being required based on findings in the field, they will be returned to Alstom stores.

Per our conversation, RTM accepts the risk of using these maintenance spares but please advise what quantities of the listed parts Alstom is holding back to ensure there are some maintenance spares available until those taken are replenished.

Please provide RTM with the list of final quantities taken from Alstom stores so that we can initiate the replenishment.

Subject: RE: OCS parts

James,

This is not a satisfactory response for us to release the parts. Clearly these parts are all being used in response to CC defects. It should not be necessary for us to notify RTM of the respective CC defects for which these parts will be used as the work will be performed by the Construction Contractor and Alstom will not be aware.

We have a contract with RTM so the transaction and handover of the materials must be with you. The Maintenance Contractor has the responsibility to coordinate directly with the Construction Contractor regarding CC defects.

As Sub-contractor we highlight to RTM the risk associated with borrowing these materials to support CC defects.

You are welcome to give me a call to discuss, but without confirmation that RTM will replenish whatever is borrowed and will cover the risk of leaving the project without spares, we cannot issue the parts.

Kind Regards

Richard France

Hi Richard,

Yes, RTM will work to replenish those parts used for CC Defect works as soon as possible. In order to track, please follow the CC Defect notice process for these parts.

Is this all of Alstom's current stock of these components or are you holding a few assemblies back as operational spares?

Regards,

James Messel P. Eng.

James, Tom,

While these items are available and ready for collection, Alstom requires confirmation that RTM will take responsibility for the replenishment of these parts promptly. Should these items be required pending their replenishment, RTM shall be liable for any associated failures arising and non-performance of Alstom.

Going forward, requests of this nature should come from RTM as we do not have a contractual relationship with other entities.

Alstom requires confirmation of the above from RTM prior to releasing the parts requested.

Kind Regards

Richard France

Hi Steven,

For the part listed without DTR reference (SECTION INSULATOR 3KV), can you please confirm it is the part below?
Manufacturer part number we have is 8WL5548-4F compared to 8WL5545-7A on parts request form.

Thanks

Subject: RE: OCS parts

Hi Steve,

Just to confirm, you are planning on replacing all parts taken correct?

We will need a list of all part numbers (Alstom DTR numbers) and qtys needed as soon as possible so we can pick and prepare to handover.

See attached spare parts list for OCS material.

After you provide me with what is needed, I will prepare a handover form that needs to be signed by the party taking the parts from warehouse staff on site.

Currently we have someone on site today until 3:30pm and Saturday/Sunday 6:30am-2:30pm. If the need for more material arises after the initial list provided, please communicate with myself and our warehouse operator Jeremy Weekes [in copy] via email and he will prepare a form and pick and handover the parts.

If there is an urgent need for a part outside of warehouse staff hours, please send email to myself and Jeremy Weekes and work with the on-site infra supervisor to get part picked. I have attached a handover form template that may be needed in such a case.

It is very important we keep careful track of everything taken so we can correct stock levels and track parts for return.

Thanks

Damien,

Just following up on this request. Do we have access to the spare OCS Parafil and terminations this weekend? Who is the point of contact should material be needed 24/7?

From: Steven Nadon

Cc: CROZIER Matthew <matthew.crozier@alstomgroup.com>; 'Peter Lauch' <peter.lauch@rideautransitgroup.ca>; James Messel <james.messel@rtmgrp.ca>
Subject: OCS parts

Damien,

We will need access to all of the spare OCS parts for this coming May 2-3 weekend and also for May 9-13 week.

What will be the process to get material out of inventory? Will the Alstom storage facility be open 24/7 during this period?

At a minimum, we should pull all Parafil assemblies, cable and termination bodies so Alltrades has access. We can keep a record of all material used.

We will also need the section insulator that need to get replaced at Blair.
