FINANCIAL STATEMENT

OF

HON. R. HARCOURT

LEGISLATIVE ASSEMBLY,
TORONTO, 14th December, 1897.

Mr. SPEAKER :-

Owing to the unusually early date of the commencement of the session, and to the fact that the accounts in the hands of honorable members cover only ten months of the present year, instead of the full calendar year as heretofore, my statement this afternoon must of necessity differ considerably from those I have previously had the honor to deliver, both as to its subject matter and arrangement.

At the very earliest hour possible the accounts for the balance of the year, viz., for the months of November and December, will be presented to the House in the usual form, and honorable members will then, as always heretofore, have the fullest opportunity to examine them in detail, and subject them in committee, if need be, to closest scrutiny.

It must be apparent to everyone that much valuable time will in this way be saved, that the business of the session will be greatly facilitated and expedited by bringing down now, as we have done, the full accounts of the year up to the end of October last, and that the convenience of honorable members will thus be best suited.

		\$3,200,218 46

Our total receipts for the ten months' of 1897 to the end of October amount, as honorable gentlemen will notice, to \$3,693,138.

It exceeds our estimate, which was of course for the whole year, by \$477,000.

In making my statement, however, last February, I expressly informed the House that I was confident that the actual receipt would exceed the estimate. We have received already during ten months of this year a considerably larger sum than we have received any one year since 1893. It is gratifying to know that we have received during the first ten months of this year \$203,467 more than we received for all of last year.

The main source of increase, it will be noticed, is in the receipt from Crown Lands.

For the period of ten months which I am now considering our total receipts from the Crown Lands Department amounted to \$1,390,178, the largest receipt of any year since 1893.

Last year we received \$925,262. The average yearly receipt from this Department for twenty-six years has been \$978,264. From the sale of Crown Lands we received this year \$84,405, from rents, mining leases, the noticeably large amount of \$154,735, and from woods and forests, \$1,132,387. From mining leases we received last year \$46,940. We sold during the year 159\frac{1}{4}\$ miles of timber lands, obtaining for it \$265,162, or \$1,665 per mile. We received up to the end of October from this sale \$88,812. The balance is still outstanding. Omitting altogether the proceeds of this sale, our Crown Lands receipts for the ten months of 1897 have been exceptionally large.

The Sandfield Macdonald Government, it will be remembered, had four sales of timber, one during each year of its term of office. The

average price realized at these four sales was \$260.41 per mile. We have had only seven sales in twenty-six years, and we have realized as our average price \$1,221.67 per mile.

The berths disposed of at our sale last August are situated chiefly near Lake Wahnapitae, in the Townships of Rathbun, Scadding, Kelly, Davis and Hanmer.

These five Townships are situated in a district that has been prospected by miners and in which hundreds of applications have been made for leases or patents under the Mines Act. The Department could not grant leases or patents before it had disposed of the pine timber.

It was therefore absolutely necessary, as well as prudent, to sell this timber in order that the applicants might obtain their titles, and that very serious loss by fire might be averted.

INTEREST RECEIPTS.

We received as interest this year on our Trust Funds and Investments \$234,647. Of this amount \$212,414 was remitted to us by the Dominion Government as the interest due us on the funds it holds in trust for us. The balance, \$22,233, represents interest on our drainage debentures and interest received from the banks on our deposits.

The plain fact, Mr. Speaker, that we have thus received this very year \$212,414 from the Dominion Government, and I expect an additional sum before the year closes, is conclusive proof that the Dominion holds in trust for us a large capital fund of several millions of dollars on which it regularly pays us interest. I will take occasion later on to refer to this question.

LICENSE RECEIPTS.

We received altogether this year from liquor licenses \$289,157. It is made up as follows:—

 Revenue from city municipalities
 \$116,162.12

 " municipalities other than cities
 154,995.00

 Total
 \$271,157.12

 Revenue from brewers and distillers, 1897
 18,000.00

Total revenue for 1897, including brewers' and distillers' licenses......\$289,157.12

The revenue from liquor licenses (not including brewers' and distillers') shows a net increase of \$2,984.00 over last year, the revenue from the cities having increased by \$3,540.00, and that from other municipalities decreased by \$556.00.

The fee for a brewer's license is \$250.00. Since last session the Privy Council confirmed our right to exact a license fee from brewers and distillers.

The following table shows the amount of license revenue retained by the Province for its own use and the amount it distributed amongst the municipalities during each of the last five years.

LICENSE YEAR.	PROVINCE.	MUNICIPALITIES.
1893	\$294,516.72	\$289,996.74
1894	277,330.14	282,473.97
1895	272,809.12	272,101.31
1896	268,172.78	267,072.40
1897	271,157.12	270,906.00

The Province of Quebec retains all license moneys and returns no part of them to the municipalities. It received from this source last year \$663,087.

The total number of tavern, shop, and wholesale (not including brewers' and distillers') licenses

Issued i	n 1892was	3,369
• •	1893	3,276
	1894	3,151
	1895 "	3,132
66	1896	3,096

a total decrease in five years of 273 licenses.

The number issued in 1874 was 6,185, in 1884, 3,970, and in 1894, 3,151. The next five years will in all probability witness a still more striking diminution. The Act passed last session abolishing saloons, and allowing only three tavern licenses for the first 1,000 of the population instead of four as in tormer years, and only one license for each 600 thereafter instead of 400 as formerly, will, in connection with the unwritten law of the survival of the fittest, inevitably contribute to this result.

The sum of \$115,104, representing what we call "Casual Revenue," is made up of more than twenty miscellaneous items of receipts. The largest of these items is that of \$33,840, which comes to us from the Provincial Secretary's department, and nearly all of this is made up of fees received for charters of incorporation. The number of charters issued greatly exceeded that of previous years. From marriage licenses we received \$2,000. In 1869 the Sandfield Macdonald Government received from marriage license fees \$31,531. Perhaps this is the only instance on record of a loss of revenue of which every one approves.

From the Insurance Department we received a little more than \$25,000. The fees received under the Ontario Insurance Act of last session amounted to \$17,864. The annual registry fees of Dominion Licensees and Friendly Societies amounts to \$13,481. We received by way of annual registry certificate fees payable by building societies, loan companies and trust companies, and for charters and application fees \$10,200. This source of revenue dates from the passing of our Loan Corporations Act of last session.

ANNUITIES.

We received from our sale of annuities this year \$156,342.

Our first sale was in 1884. In that year we sold to the amount of \$13,400 a year. This year we only needed to sell to the amount of \$7,000 a year, and the difference in amount of course represents our improved position as to these railway obligations. The amount we sold this year was smaller than that of any previous year. During the next few years, unless we grant aid to railways to a large extent in the meantime, these railway obligations will decrease considerably.

Next year these obligations will be \$28,000 less than those we have met this year, in 1899 there will be another drop of \$14,000, the following year a drop of \$6,000, and tour years from now they will, as compared with this year, be diminished to the amount of nearly \$80,000. In 1884, the year of our first sale, the purchaser's investment brought him an interest yield of about $4\frac{1}{2}$ per cent. The purchasers this year will receive less than $3\frac{1}{4}$ per cent. on their investment.

It must always be remembered that the issue and sale of these annuities does not add one dollar to our existing obligations. When we sell annuities we merely postpone the railway obligations which mature during the year in which the sale takes place. We have had nine sales of annuities since 1884. We have had five sales during the last two parliaments. We have not sold them every year. We did not sell them, for example, in 1893 or 1894, or in 1880, 1889 or 1890. We have paid out for railway aid since 1884 \$1,013,204 more than we have received from our nine sales of annuities.

During these two parliaments moreover, that is from 1890 to 1897 inclusive, we have paid out for railway aid and to retire annuities \$1,099,732 more than we have received from the five sales of annuities referred to.

SUCCESSION DUTIES.

I estimated that we would receive from succession duties during the year \$175,000. Up to the end of October we had received \$83,546. Only

fifty estates out of three or four thousand came within the Act. I will before the session closes be able to give the exact number of estates which were administered during the year. In twenty-five of our counties not a single estate paid duty this year. The county of York, including Toronto, paid half of the total sum we received.

Since 1892, when our Act was passed, we have received in all \$744,376. The Government claims and is entitled to much credit for this large receipt. All economists agree that this is as just and equitable a means of raising revenue as has ever been devised. It fully conforms with the foundation principle that all taxation should have regard to the ability to pay on the part of the taxpayer. Under our Act only large estates (and we have but few of them in our young country) are dutiable. But one estate out of every fifty is reached by its provisions. Direct heirs very rarely pay anything. Collateral and remote heirs bear nearly all of the burden. No estate less in value than \$10,000 pays any duty under any circumstances. Neither husband, wife, or child, father, mother or grand-child, or son-in-law or daughter-in-law, is called upon to pay anything unless the estate exceeds \$100,000 in value.

In other states and countries, New York, Pennsylvania and England itself for example, similar Acts have a much wider application, a higher scale of duties, and reach much smaller estates. Everyone of our sister Provinces has copied our legislation in this direction. The receipts under our Act are ear-marked by the statute itself and must go to charitable purposes. Our statute dees not apply to property given, devised or bequeathed for religious, charitable or educational purposes. Succession or inheritance duties to the amount of \$2,126,894 were received in New York State during one fiscal year, viz., 1895. The British Government received last year a million of dollars from a single estate.

ASYLUM EXPENDITURES.

We expended during the ten months for public institutions maintenance \$692,059. This is more than one-fifth of all our expenditures. We spent for this purpose during all of 1896, \$796,567. In our seven large asylums there were 4,851 patients in residence on the 30th day of September last. The daily average population for 1897 was 4,867. There were thirty-three more female patients than male.

This is nearly four times as many patients as we had twenty years ago. There were 158 more than we had during the previous year. The daily average population in 1894 was 4,334; in 1895, it was 4,557; in 1896,

4,709, and in 1897, 4,867. The annual cost per patient this year is \$126.28, as against \$134.55 last year. It will be at once admitted that this in itself evinces on the part of those in charge of these institutions, great care and watchfulness as regards every item of expenditure.

We include, in common with several of the United States, (Massachusetts for example), in our per capita cost, ordinary repairs.

In six State asylums of Massachusetts, the annual per capita cost was \$176,80. The per capita cost in our seven asylums is \$126.28.

At the Pontiac Asylum, Michigan, it was, according to the last annual report, \$175.41, and at the Mattawean Hospital New York, \$192.20.

The last reports I have at hand furnish me with some additional comparisons which will, I know, interest the House. The asylums, or hospitals, as many prefer to cal them, which I will name are large and well equipped institutions

	Weekly cost	Annual cost
	per capita.	per capita.
Elgin, Illinois	\$2 70	\$140 30
Utica, New York, 1896	3 82	198 62
Willard, New York, 1895	2 *3	147 42
Hudson River, New York	3 92	204 80
Middletown "	3 75	195 31
Buffalo "	3 53	183 56
Binghampton "	3 59	186 68
St. Lawrence "	4 23	219 85
Rochester "	4.50	233 44
Province of Ontario, 7 asylums.	2 43	126 28

We spend more for the maintenance of our public institutions than we do for any other single service, viz., nearly, if not fully, \$2,200 a day; out of every \$100 the Province spends, nearly \$22 of it is required for their support. It means a great deal therefore that we are able conclusively to show that we maintain them at a considerably less cost than is required for exactly similar institutions elsewhere.

That they are efficiently managed and generously provided for both as regards diet, clothing, and expert professional treatment, no one will pretend to dispute.

In only seven or eight of the United States are the indigent insane cared for by the State. New York State is one of these, and it levies a special tax on all the taxable property of the State for their support. Taxes to the amount of \$4,292,346 were so levied in 1896 for this special purpose.

In eighteen of the States, among them Iowa, Illinois, Michigan and Massachusetts, the burden of this great care rests solely on the municipalities.

The Province of Quebec assumes half of the burden and throws the other half on the municipalities. Nova Scotia gives a small contribution towards their maintenance, amount to one-fifth of the gross expenditure. In Ontario the municipalities, on the other hand, are relieved of the burden altogether.

I could readily give further illustrations to show that this Province is extremely liberal in the grants it gives with the object of relieving the municipalities.

Our two largest items of expenditure are those for Education and for maintenance of our Public Institutions.

In 1895 we expended for Education \$693,042, while the Province of Quebec expended only \$371,260.

In the same year we spent for maintenance of public institutions, including hospitals, \$989,443, while Quebec spent only \$378,158.

The insane asylums of the State of New York are beyond question carefully managed institutions. The people of the State, as I have said, are taxed directly for their support. A ratepayer assessed for \$3,000 pays about \$3 a year for this purpose.

It is often urged that where direct taxation is resorted to, the taxpayer will closely scrutinize every outlay and insist on strictest economy.

And yet we have succeeded in this Province in keeping our asylum expenditures considerably under those of the State of New York.

Does not this tend to prove that we manage our institutions with due regard to economy?

The State Commission in Lunacy in New York State carefully revises the detailed monthly estimates, which are prepared by the stewards of the various hospitals under the direction of the superintendents. Every precaution is taken to keep down expenses.

It will, I am sure, interest hon, members if I compare or contrast with some detail one of these New York State institutions with one of ours as regards expenditures. The asylum at Ogdensburg, New York, is called the St. Lawrence State Hospital. The River St. Lawrence, and it alone, separates it from our Asylum at Brockville. No two institutions could be more similarly circumstanced. There is accommodation for 1,300 patients at Ogdensburg and 506 for at Brockville.

The capital expenditure on lands, buildings and furnishings at Ogdensburg amounts to \$2,272,467, that at Brockville \$440,126.

The rate of cost per bed at Ogdensburg is \$1,758, at Brockville \$870.

The per capita cost of maintenance at Ogdensburg last year was \$213, at Brockville \$143.

The number of medical officers at Ogdensburg is 1 for every 127 patients, at Brockville 1 for every 193 patients.

The number of officers, attendants, nurses and employees at Ogdensburg is 1 for every 4 patients, at Brockville 1 for every 6.

At Ogdensburg \$82 is paid for salaries of officials and employees for every patient, at Brockville \$48.

All supplies at Ogdensburg are bought by the steward in the open market: we buy our supplies for the main part (viz., 84 per cent.) by tender.

Their Commissioners believe they can only make sure of getting provisions of the best quality by buying in the open market.

The buildings at Ogdensburg, having regard to the accommodation, cost twice as much as those at Brockville, the per capita cost of maintenance is 60 per cent. higher, the number of officials 50 per cent. larger.

The salaries paid to officials generally at Ogdensburg are nearly DOUBLE those paid at Brockville.

The Superintendent of the Ogdensburg Asylum, the Assistant Superintendent, and the Bursar, each of them receive twice as large a salary as we pay the same officials at Brockville.

These figures speak so plainly and forcibly that I need not further comment on them.

May I give another comparison? I will refer to 6 representative asylums situate in four of the most advanced States of the Union.

PER CAPITA COST OF PATIENTS IN SIX AMERICAN ASYLUMS IN 1896.

	Annual	Weekly	Daily Av'ge
	Cost.	Cost.	Population.
Kalamazoo, Mich	\$189 92	\$3 46	1,177
Pontiac, Mich	175 41	3 37	1,059
Columbus, Ohio	136 70	2 63	1,274
Cleveland, Ohio	134 04	2 57	1,100
Warren, Penn	187 72	3 61	944
Harrisburg, Penn	183 62	3 33	841
Province of Ontario	126 28	2 43	4,254

The average weekly cost per capita for the maintenance of lunatics in these asylums was \$3.16. In Ontario asylums, for 1897, it was \$2.43, a difference per capita of 73 cents weekly.

The average daily population of lunatics in 1897 in Ontario was 4,254. If the same average rate of maintenance was charged in Ontario as in the American institutions it would mean to us an increased expenditure of \$161,476.64 a year.

If the average rate in Ontario were applied to the above American asylums it would mean a saving to them of \$242.754.20 a year.

The foregoing 6 American asylums are thoroughly representative. Their circumstances and conditions are not unlike ours. A comparison with them is therefore fair and reasonable. The per capita cost of management in each of them is higher than in any of ours.

They have a larger population than ours and that fact should tend to diminish their per capita cost, since the cost of management should decrease with increasing numbers.

The cost of fuel, a very important item in the cost of maintaining asylums, is much less in these States than it is in Ontario. In a recent report of the Columbus Asylum, for example, this statement appears;—
"We have a contract for coal this year at the remarkably low price of \$1.04 per ton."

The following summary will prove of interest:

	Average annual cost.	Average weekly cost.	Popula- tion.
6 American asylums	\$167.90	\$3.16	6,395
6 Ontario asylums	. 126.28	2.43	4,254

LEGISLATION.

In 1895 the cost of Legislation in Ontario was 7 cents per head, while in Quebec it was 13 cents, and in the Dominion $17\frac{1}{2}$ cents.

CIVIL GOVERNMENT.

The cost of Civil Government in Ontario in 1895 was $11\frac{1}{2}$ cents per head, in Quebec $17\frac{1}{2}$ cents, and in the Dominion $29\frac{1}{2}$ cents.

And yet we have never heard of our critics opposite complaining of the excessive expenditure at Ottawa or Quebec, either as regards Legislation or Civil Government.

EXPENDITURES NOT CHALLENGED.

Examine, Mr. Speaker, the whole period of Liberal rule in this Province, from 1871 until the end of 1896, and you will find that the Opposition in the various intervening parliaments have challenged less than three-fifths of one per cent. of all our expenditures.

The Opposition in this present parliament has taken objection to less than one per cent. of all our expenditures.

Nearly all of our expenditures pass unchallenged, but when an election approaches, the old and time honored cries of waste and extravagance are revived.

A considerable portion of our yearly expenditure consists of direct grants, apportionments of money sent to County Treasurers, Treasurers of School Boards, of Agricultural Societies and of Hospital Boards. We give the money itself directly back to the people, and they spend it in their own immediate localities in relief of their local burdens. In 1896, for instance, we gave direct grants in this way to the amount of \$1.002,698. For example, if we take all our expenditures of a single year, we will find that out of every \$100 the Province spends, \$19.93 of it is spent for maintaining our public institutions, \$16.95 for purposes of education, \$15.12 for public works and buildings, \$9.74 for administration of justice, \$5.61 for railway aid, \$4.34 for agriculture, \$4.22 for hospitals and charities, \$6.18 for civil government, \$3.55 for legislation, \$2.87 for colonization roads, \$2.48 for charges on Crown lands, \$2.06 for repairs to public buildings, 18 cents for immigration and \$4.89 for the many various unclassified items which make up what we call miscellaneous expenditure.

This analysis of itself shows at a glance what large sums we return each year to the people, and how little is expended for ordinary purposes of government.

INCREASED GRANTS IN AID.

We have spent under the head of Education this year \$673.189. Our total expenditure last year for this purpose was \$702.457. In 1877 we spent \$570.760. Out of each \$100 the Province spends, about \$19 of it goes to support our schools. For hospitals and charities we have given, and these are cash payments sent to the Treasurers of the various institutions, this year \$192.694. We gave \$4,000 each to the Houses of Refuge in the counties of Perth and Lambton.

For agriculture we spent this year \$168,052. In 1887 we spent \$130,567. For administration of justice we spent this year \$358,642, while

ten years ago we spent \$324.495. This illustrates in what ways our expenditures increase. In each case the additional expenditure carries with it corresponding relief to the municipalities.

Our total expenditure for all of 1897 will be considerably less than the House authorized us to spend. We spent last year \$143,587 less than the House voted, and the same statement is true for every year for ten years past, and the amount unexpended each year is considerable.

Is not this fact conclusive proof of our earnest desire to economize whenever possible?

The additional fact that our total expenditures have been continuously decreased for several years past cannot be overlooked.

Our total	expenditure	in 1-91	amounted	to	\$4,158,159.
6.	"	1892			\$4,068,257.
	"	1893			\$3,907,145.
		1894		*****	\$3,842,505.
		1895			\$3,758,595.
		1896	- 66		\$3,703,379.

I can assure the House that our total expenditure for all of 1897 will be considerably less than that of 1896.

Some of our expenditures are uncontrollable. They increase automatically from year to year.

Our grants for Education, for Agriculture, for maintaining our large asylums with their ever-increasing number of inmates, are of this character. Other expenditures, on the other hand, are well within our control, and it is by exercising care and caution, prudence and economy as to this class that we have been able year by year for seven years in unbroken succession to cut down our aggregate expenditures.

Will honorable gentlemen opposite name a Province or a State in which so desirable an end has been successfully accomplished?

SANDFIELD MACDONALD'S POLICY.

Hon. Gentlemen opposite have been for months past talking continually about the policy and economy of the Sandfield Macdonald Government.

Was it the policy of John Sandfield Macdonald to keep adding to the surplus year by year, and thus form a large reserve fund to be constantly increased by yearly accumulations? Neither he nor any member of his Government advocated such a policy for a single moment. No member of any government in any country so far as I know ever acted on such a policy. Let us consider briefly what his financial policy was. When he left office there was in the Treasury, as I shall show later on, an available cash surplus of less than \$1,350,000. Our financial critics opposite from a hundred different platforms have recently stated that it amounted to \$4,000,000. Their mistake or exaggeration to the extent of \$2,500,000 is one of several striking examples which I could readily give of the loose assertion, of the unrestrained license of speech they habitually indulge in, when discussing our finances.

Some of them, I am compelled reluctantly to say, judging from their exaggerated speeches only recently delivered, do not seem to even think it necessary to respect the intelligence of their audiences. In a new Province, with its ever-increasing and loud demands for such liberal aid and generous expenditure as would alone furnish the means of helping the people to help themselves—this available cash surplus of \$1,350,000, which the Sandfield Macdonald Administration accumulated from 1868 to 1871, must soon have been exhausted.

His setting apart in his last year of office by statute the sum of \$1,500,000 to aid railways plainly indicated that his policy was in this way to open up the country and develop its resources, and not to hoard up year by year a growing surplus.

Besides, there is a plain and manifest reason why he did not at an earlier date announce a policy of large expenditure, or of distribution of the available money on hand, for public uses.

The reason, Mr. Speaker, briefly and undeniably, is as follows:

In these early years, from 1868 to 1871, the Legislature and Government were looking forward, as we are even now, to the final adjustment of the accounts between the Provinces, and it was then believed—and the Treasurer of that day is himself on record as holding this view—that the result of that adjustment might possibly impose a serious charge on the Province of Ontario. Indeed it was more than hinted at, during these early years, that our Special Funds might necessarily be drawn upon to meet this charge.

The uncertainty, then, as to what the real financial condition of the Province was, the doubt which prevailed as to the amount of the surplus of debt in excess of \$62,500,000, that being the extent of Provincial debts which the Dominion agreed to assume at Confederation, the fact that deductions to the amount of \$291,666 a year were actually made from our subsidy in the early years, up to 1874, to meet the interest charges on this excess of debt; this it was which prevented the Macdonald Adminis-

tration from entering upon its policy of distributing surplus revenues earlier than it did. Had it not been for such circumstances the Macdonald Government would not have left an available cash surplus of even \$1,300,000.

Our friends opposite seem, at election times at least, to forget, and wilfully too, the dominating circumstances of the case.

SANDFIELD MACDONALD'S SURPLUS.

I have stated, Sir, that the Macdonald Administration left office with an available cash surplus of \$1,350,000. The facts, in connection with it, are as follows: At the close of 1871 the Province had at its credit—

(1) Invested funds to the amount of \$3,637,979, and (2), cash on hand, \$172,985, or altogether \$3,810,964.

\$1,500,000 set apart in 1871, by statute, for Railway Aid, and which could not be used for any other purpose. (2), \$691,131, composed of payments made by the Dominion for Ontario during the term of the Macdonald Administration for various services rendered the Province of Ontario from July 1st, 1867, to December 31st, 1871, such as Education, Administration of Justice, Hospitals and Charities, and maintenance of lunatics at Rockwood Asylum. These items were charged up against Ontario, and not settled for until long after 1871. (3), \$197,000 due to the Province of Quebec from Ontario, as its share of the collections from sales of Common School Lands made during the years of the Macdonald Administration. This amount has been paid in cash to Quebec since 1871. (4), \$96,500, being the price of the Rockwood Asylum, bought from the Dominion Government prior to 1871, but not paid for until after 1877.

These four items, taken together, amount to \$2,484,631, and deducting this from \$3,810,964, we have remaining \$1,326,333, as the exact available cash surplus left in the Treasury by the Macdonald Administration.

Our opponents further say that as soon as John Sandfield left office his successors, the Liberals, began at once to diminish the surplus. This is another reckless and totally unwarranted statement.

THE SURPLUS OF THE MOWAT GOVERNMENT.

Whatever the surplus was, Sir, at the end of 1871, when Sandfield Macdonald left office, it was greatly added to in 1872 and 1873, as well as in later years, by the Mowat Government. The Province, at the end of

1871, had, in investments and in cash, \$3,810,964, while at the end of 1873 it had also in like investments and in cash \$4,726,431.

At both dates I exclude what we call the Trust Funds. In these two years, therefore, viz., 1872 and 1873, the first two years of the Mowat Government, the existing large cash surplus, outside of the Trust Funds, was augmented to the amount of \$900,000, and yet, Mr. Speaker, the Leader of the Opposition is reported in the *Toronto Mail* of November 4th last, to have said, when speaking at Millbrook: "I tell you, and I would be worse than a fool if I did so without knowing it to be true, that during the existence of Sir Oliver Mowat's Government, there never was an instant of time when the Government had a surplus."

The truth is, Sir, there has never been an instant of time when the Mowat government had not a surplus of millions of dollars. (Applause.) To-day, allowing for every possible liability, present and future, including of course our railway obligations, we have an available cash surplus of at least from two to three millions of dollars. The question of the surplus, its amount, and of these railway obligations I will discuss later on. The extremely rash and random statements of my honorable friends will not alter the facts. This very year, Mr. Speaker, we will have a large surplus, our total receipts exceeding our total expenditures by at least \$350,000.

The surplus we have been discussing for so many years past, is for the most part the creation of the Mowat Government. In the years 1872 and 1873 to which I have just alluded, as well as in later years, for example in 1880, 1881, 1887, 1888, 1892 and 1893, and this very year, 1897, the total receipts of the Mowat Government and of the Hardy Government were largely in excess of the total expenditures. The annual savings and accumulations of these years I have just named amount to more than \$2,500,000, and in each of these years there were extraordinary expenditures of which every one approved outside of the Supply Bill, and in the aggregate involving a large outlay of money.

Our opponents evidently seek to conceal the facts from the people. Our railway aid policy inaugurated in 1871, has entailed up to the present time an expenditure of more than \$6,500,000 and our surplus distribution scheme an outlay of \$3,389,000. This last named sum was divided among the municipalities of the Province chiefly in the years 1874 to 1877 inclusive. These two policies viz., railway aid and surplus distribution were deliberately intended to have the effect of diminishing our invested surplus funds. The Legislature passed the enactments concerning railway

aid and surplus distribution with the very object. I repeat, of diminishing the surplus belonging to the Province. The Legislature plainly in ended that our invested funds should be drawn upon from time to time to meet these very objects. It was after most careful deliberation thought desirable that the surplus revenues of the Province should be utilised as far as possible in developing our resources by means of railway grants, and also, while relieving indebted municipalities, to compensate as far as practicable the municipalities which had not borrowed. It was deliberately thought undesirable to hoard our surplus revenues, to lock them up, to keep them unproductive. In the light of these plain facts, all the criticisms of our opponents are grossly unfair and misleading. May I not fairly ask that those who pretend to instruct public audiences, should, in dealing with these important questions, seek at any rate to keep mod erately within the bounds of exact statement? But, our critics say, we should live within our means, we should do as the John Sandfield gov ernment did.

It seems needless, Sir, to repeat at this time, but I feel compelled to do so because of the line of attack of our opponents, that all comparisons between the Macdonald administration and ours as to matters of expenditure are ill-timed and misleading, and that all conclusions drawn therefrom are futile and valueless. We must once again remind them that the Ontario of to-day is twice as large territorially as it was in Sandfield's time, that we have 600,000 more people to govern, and that in the intervening years the work of development, of expansion and of growth has in a hundred different ways been going on unchecked. The irreducible minimum of demands on the Treasury is to-day four or five times as great as it was then. I must for the present content myself with only a few hurried illustrations.

1871 AND 1896 CONTRASTED.

John Sandfield left office at the close of 1871. Neither the Central Prison, nor the Institution for the Blind at Brantford were in existence at that time. The buildings themselves cost a large sum of money. Their maintenance alone last year cost \$95,205. The only asylums for the insane we had at that time were those at Toronto and London and part of that at Kingston. We have since built large asylums at Hamilton, Orillia, Mimico and Brockville.

The erection of these four new asylums alone cost us \$2,346.000, and for their annual upkeep we are compelled to pay \$297,000. They accommodate 2,650 patients, and they are all filled to-day save one of the cottages at Brockville.

We maintained only three asylums in 1872 at a yearly cost of \$190,024. We now maintain seven asylums at an annual cost of \$605,788.

In 1871 only 1,366 patients were cared for altogether. We now care for nearly 5,000. We must not forget that when we add to our public buildings we necessarily and proportionately add to our public annual maintenance charges.

Under the Macdonald administration not a dollar was actually spent in aiding the construction of railways. For this one purpose we have since 1871 spent more than \$6,500,000. We have now in the Province 6,542 miles of completed railway in actual operation, and 1,977 miles of it have received substantial aid from the Provincial Treasury.

The construction of these railways entailed an expenditure within the boundaries of the Province by way of wages, materials, rolling stock, etc., of \$50,000,000 or \$60,000,000, a vast expenditure of money which in a variety of ways stimulated trade and otherwise aided in the development of our resources.

Our friends opposite in a petulant way complain of our financial administration, and in vague, general, loose terms denounce it. As a special evidence of our mismanagement they point to the railway certificates and annuities issued from time to time.

Here, Sir, is an expenditure of over \$6,500,000 given by us in aid of railways since 1871. Let us come to close quarters for once. Did any one of our critics, and some of them have had seats in this House for two or three parliaments, ever object from his seat in this House to a single dollar of it? Will my honorable friend from Lanark or from West York now rise and name the railway which we aided and to which we should not have given aid?

Has my honorable friend who leads the opposition a different railway policy to propose? If so, the country will be glad to learn of it. So far as I know, he has not to this hour on a single occasion taken objection in the House to our scheme of railway aid, or to any part of it, or to the issue of a single railway certificate. The money we have given to railways alone since 1871 has more than four times over exhausted the cash surplus left by the Macdonald administration.

And yet the Leader of the Opposition says, and keeps saying, that we have squandered the surplus of the previous Government. Not one dollar of it, as he well knows, was spent for ordinary purposes of government, or as part of our current, ordinary, or normal expenditures.

Under the Surplus Distribution Scheme there was paid directly to the municipalities of the Province from the Provincial Treasury, mainly in the years 1874, 1875, 1876, and 1877, more than \$3,388,000, and the municipalities throughout the Province in their turn expended this large sum thus directly given to them out of the Provincial Treasury on roads and bridges, town halls and schoolhouses, and in paying off their own railway debts. This is the kind of Provincial expenditure which our critics at one time call squandering the surplus and at another time dissipating the surplus.

The Macdonald administration in its last year spent by way of educational aid \$351,000. We spent in 1896 exactly twice as much, viz., \$702,000. The difference, if hoarding were our only object, would in a ingle year make a nice addition to our surplus. In the course of a single Parliament we could in this way save, if this can be called saving, \$1,400,000.

Of this large sum of \$702,000 the Opposition last session objected to only \$13,900, and it has been already shown, Mr. Speaker, that the items so objected to, making up this \$13,900, are not only in themselves unobjectionable, but also that the policy of our critics in regard to them is short-sighted and unsound.

INCREASED GRANTS TO MUNICIPALITIES.

John Sandfield in his last year spent \$76,000 in aiding agriculture. Last year we spent \$192,000. His Government gave for hospitals and charities in 1871, \$40,000, and we gave five times as much, viz., \$196,000 in 1896. In these three directions alone, viz., education, agriculture, and hospitals and charities, the Macdonald administration in four years spent \$1,715,828, while in our last four years, viz., from 1893 to 1896, inclusive, we spent \$4,198.919.

By pinching these three vastly important services down to the narrow limits fixed by the Macdonald administration, we would have added in the short space of four years to our surplus an accumulation of \$2,483,090.

In other words we gave back to the people in these three ways alone in four years \$2,483,090 more than the Macdonald Administration gave for a like period. To this extent we lightened the burdens of our people. Does not this prove conclusively the utter, I might well say ridiculous absurdity, of comparing the expenditures of our early years with those of recent years, and yet, Sir, it is the fact that in every campaign speech of hon. gentlemen opposite, without a single exception, constant references

have been made to the scale of expenditures of the Macdonald Administration with the aim of showing that the present Government has been extravagant.

But let us pursue this subject a step further and take seven services, viz.:—Administration of Justice, Education, Public Institutions Maintenance, Agriculture and Arts, Hospitals and Charities, Colonization Roads and Railway Aid, and see what sums we would have saved in four years alone, viz., from 1893 to 1896 inclusive if we had not exceeded the limit of expenditure and the measure of Provincial Aid of the Macdonald Administration.

For these seven services alone the Macdonald Administration in its four years from 1868 to 1871 spent \$3,230,068, while the present Government for the same number of years from 1893 to 1896 spent \$10,019,220, a difference in the measure of aid of \$6,879,152 in four years.

By standing still, by marking time, by closing our ears to every suggestion of progress and advancement we could in this way have kept in the Treasury in these four years nearly seven millions of dollars, and added that amount to our surplus. Instead of keeping it in the Treasury we gave it back to the people.

On the one hand we would have had justice less efficiently administered, impoverished schools, inadequate accommodation for the insane and the destitute, fewer cots and beds for the sick in our hospitals, the newer and northern portions of the Province neglected and undeveloped for want of railway aid and colonization roads, and on the other hand a larger surplus.

We deliberately chose the former, remembering that an educated people was the most valuable asset a nation could possibly have, that wise expenditure rather than hoarding is often times truest economy, and that no country in the long run was ever known to suffer through the munificence of its charities. (Applause.)

Moreover, Sir, I wish now with all respect to ask my hon. friends opposite what special right they have to pose as the political heirs of John Sandfield Macdonald, what have they in common with his economical methods of government? Have they not given their unswerving support for eighteen long years to a government elsewhere which was never accused even for a moment of ever seriously entertaining considerations of thrift or economy?

Hon. gentlemen opposite are not his heirs; they are pretenders and usurpers only.

The real heirs of John Sandfield Macdonald as regards his methods of economical administration are to be found on this side of the House, rather than on the Speaker's left.

But further, do our critics opposite for a moment imagine that the electors regard seriously their pretended burning zeal for economy?

The Leader of the Opposition and his every follower in this House by their votes and speeches have justified and supported on all occasions from 1878 to 1896 a financial policy and methods of expenditure at Ottawa the very reverse of economical, which the people of the whole Dominion by their votes have very recently emphatically condemned.

DIRECT TAXATION.

In every one of the speeches of my honourable friend, the Leader opposite, while on his pilgrimage, he keeps repeating the statement that the Province is going behind, that we are not living within our means, that direct taxation is staring us in the face.

Why, Sir, this House has long been familiar with those old, stale, parrot cries rehashed over and over again these twenty years. The electors of the Province have time and again deliberately pronounced upon them, and the verdict has invariably been in favor of the Government.

The Province is not going behind. I will discuss the matter presently. Will my honourable friends opposite name the Province in our Confederation, the State in the Union to the south of us, or any country wherever situate, which is more progressive than ours, which is better circumstanced financially, which is further removed from direct taxations, or in which strictest economy in the truest sense has been more religiously observed? (Applause.)

More than twenty years ago, and spasmodically ever since, the cry of the Opposition was that we were on the verge of direct taxation. The same melancholy clap-trap—it is nothing else, Mr. Speaker—is now, on the eve of another general election, again resorted to.

Our people know full well that the best means of averting direct taxation, or oppressive financial burdens of any description however imposed, is to maintain in power a government whose stock in trade is not the mere empty promises of untried men, but a long and unbroken record of careful, progressive, and economical administration.

GROWTH AND PROGRESS.

Is the Province going behind? Let us for a moment look beneath the surface, and not trust solely and blindly to desultory and inconclusive statements.

The total receipts of the Province from all sources from its very first year, 1867, down to the close of last year, 1896, amount to \$89,365,700. The total expenditures of the Province of all kinds for the same period amount to \$89,131,561.

We have thus a balance of \$233,000 on the right side of the ledger at the end of thirty years of satisfactory and continuous growth, expansion and development in a hundred directions. The indisputable fact, Sir, is that we had to our credit in our banks at the close of last year \$227,000.

Thirty years of progress characterised in a marked degree by liberal provincial grants in aid of every deserving public object—educational, charitable, agricultural and otherwise, extensive additions in the way of public buildings and public works to our permanent assets from time to time costing several millions of dollars; no service neglected, no waste of public money, no yielding for the sake of mere hoarding to the vice of parsimony, a large cash balance to the good, and an available surplus of cash assets in our trust lands, drainage debentures and other investments, amounting to millions of dollars over and above every obligation, present nd future.

And yet my honourable friends opposite cry out, forsooth, that the Province is going behind.

The House will allow me, Sir, to give some further details by way of fuller explanation.

It is plain, then, that we have not gone behind, taking under review the whole period of our separate existence as a Province, since, as I have shown, our total receipts from 1867 to 1896 inclusive have exceeded by a considerable sum, viz., \$233,000, our total expenditures. In these receipts I include interest on our trust funds which were assigned to us at Confederation. I am, of course, not taking into consideration at present the corpus of these funds.

SUMMARY, 1890 to 1893.

Let us in addition, however, take recent periods and ascertain whether we are going behind or not. Last Parliament embraces the years 1890 to 1893, inclusive. Our total receipts for these four years amounted to \$16,516,579, and our total expenditures \$16,035,985. Instead of going behind, therefore, we saved out of our annual receipts during these four years more than \$480,000. I may be told that we sold annuities in two of these years to the value of \$428,000, and that this amount is included in the receipts. Deduct this \$428,000 and even then the total receipts for the four years exceeded the total expenditures.

We should not, however, deduct this \$428,000, inasmuch as during this period we paid out to retire railway aid certificates and annuities \$1,060,265. The proceeds of our sales of annuities are applied in retiring maturing railway certificates. If we deduct the special receipt we should also deduct the corresponding special expenditure.

Further, during the last Parliament we spent nearly \$2,750,000 on much needed public buildings, and added to that extent to our permanent assets. These large capital expenditures are properly chargeable to capital account and not to current revenue. They amounted in round numbers during these four years to \$3,810,000, made up of (1) \$1,060,265 paid out for railway aid, and (2) nearly \$2,750,000 spent for the erection of public buildings.

To meet these large abnormal expenditures we had in these four years, outside of our ordinary current revenue, only the proceeds of two sales of annuities amounting together to \$429,000 and \$700,000, received part in 1891 and part in 1893, as payment of Dominion bonds we held and which matured in those years. We reduced our drainage investments during the Parliament by only \$21,000. In a word, in these four years we added to our cash deposits in the banks \$483,000 or more than \$100,000 a year. We paid out for railway aid over and above the \$429,000 which we received from our two sales of annuities \$631,800, and without borrowing a single dollar, as is almost invariably done in other countries, spent on public buildings \$2,750,000.

Our critics have not the fairness to state to their audiences that we have in recent years spent millions in erecting public buildings.

We spent during these four years \$966,000 on these new Parliament Buildings; \$360,000 on the new asylum at Mimico; \$192,000 on the new Orillia Asylum; \$113,000 on the new Brockville Asylum, besides giving in cash to Toronto University in its hour of direct need \$160,000.

During the same period we paid to superannuated teachers \$251,270; to maintain our successful exhibits at the Chicago Exposition \$99,000; in aid of the sufferers by the St. John's fire \$10,000; for the Fish and Game Commission \$10,000, not to speak of other considerable sums which are equally outside of the range of our ordinary normal current expenditures.

Our ability from year to year to meet such extraordinary expenditures, and the House unanimously concurred in all of those I have named, is clearest proof that the Province is prosperous and progressive, that it is not going behind.

I have noticed, Mr. Speaker, that in all the speeches of the honorable gentlemen opposite, a labored attempt has been made to show that during the last three years we have been going behind.

I have plainly shown that taking the whole period since Confederation the total receipts of the Province have exceeded the total expenditures, also that this is true concerning last Parliament, viz., the period from 1890 to 1893 inclusive.

SUMMARY, 1894 TO 1897.

I am now fully prepared to meet my honorable friends and show conclusively that as to the present Parliament they are wildly in error, and that the closer the financial record of the years 1894 to 1896 is examined the better it will be for the Government.

The only fair way if we wish te arrive at the truth is to take a period of years, and for convenience sake I have taken the period of a Parliament.

If we have a large bank credit at the beginning of a Parliament, surely in framing our estimates of expenditures, we would keep this fact in mind and remember that we have this large balance in reserve to draw upon in case the House deemed it prudent to expend any part of it for some urgent public need. This is our position exactly as regards the last three years.

We commenced this Parliament January 1st, 1894, having at our credit in the banks \$1,000,016. At the end of 1896, three years thereafter, we had in the banks \$226,820, and our critics cry out that we have gone behind to the extent of the difference, viz, \$773,196.

Let us see exactly what we did with this \$773,196, whether it has been wisely expended or not.

We made various large expenditures during this period, simply because we knew we had this large reserve fund to draw upon. The over-expenditures of 1894-5 and 1896 were paid for out of actual cash on hand.

Not a dollar of this large credit bank balance was drawn upon or used to meet current or ordinary expenses. Our ordinary receipts for each of these three years more than met our ordinary expenditures. There was not a deficit in any one of those years.

We cannot include capital expenditures, such as those for Railway Aid, Public Works, or Public Buildings, and charge them up against our ordinary yearly receipts, and in this way figure out a deficit.

We must do, if we wish to be fair, what the Dominion Government has always done, what the other Provinces have always done, what is done in England, viz., charge up these capital expenditures to capital account, and not charge them against the ordinary current revenues of the year. Let us take these three years, 1894-96, separately.

In 1894 our total receipts were \$3,453,162, and our total expenditures, deducting those on capital account, viz., for Railway Aid and Public Buildings, \$3,218,000. We spent for Railway Aid in 1894 \$221,-700, and for Public Buildings, \$403,000. We did not sell annuities in 1894. We spent on the Brockville Asylum building alone \$198,000.

To meet capital expenditures we drew on our cash reserve in 1894 to the extent of \$389,000. I repeat that we spent in that year for Public Buildings \$403,000. We decreased our cash balance \$389,000, but we added \$403,000 to our permanent assets in the matter of Public Buildings. In other words, we convert cash on hand into the Brockville Asylum cottages, and our critics say that this is a proof that we have gone behind.

We had \$1,000,016 cash in the banks, and we urgently needed more asylum accommodation. Which was the better course to pursue? Draw upon our cash reserve, or keep it intact, and leave our lunatics in the different gaols of the Province, instead of erecting asylum cottages at Brockville?

Additions to our Permanent Assets.

A simple illustration will occur to the mind of every hon. member. A farmer, or a man in business has, say at the beginning of 1894, \$5,000 to his credit in the bank. He needs a new house and outbuildings. They are indispensable to him. He spends during 1894 say \$2,500 in erecting suitable buildings, and at the end of the year he has only \$2,500 in the bank.

He has converted \$2,500 of his cash on hand into buildings. He has merely changed the nature of his assets. Our critics say that he has gone behind to the extent of \$2,500. In reality, he is better equipped for doing profitable work. This is exactly their argument as regards our financial year, 1894.

Similarly in 1895 we drew again on our cash reserve to the amount of \$173,093, but we spent in the same year on Public Buildings alone (not to speak of Railway Aid), \$265,600, so that in 1895 there was not a deficit. We converted again some of our cash on hand into needed Public Buildings Our ordinary receipts in 1895 exceeded our ordinary expenditures by \$158,000.

In 1896 our ordinary receipts exceeded our ordinary expenditures by \$87,000. At the close of 1896 we had a comfortable credit cash balance

in our banks amounting to \$226,820, and during the three preceding years we expended on Public Buildings \$877,998, and for Railway aid, over and above our receipts from two sales of Annuities, \$379,000. In a word, during this present Parliament up to the close of 1896, we drew upon our cash reserve to the extent of \$773,196, while we spent on Public Buildings alone a considerably larger sum, viz., \$960,888.

We converted cash on hand into buildings, and our critics cry out that the Province is going behind. The small reduction in our drainage investments does not affect my argument.

All governments and all political parties, so far as I know, save the Opposition in this House, make a clear distinction between ordinary and capital expenditures.

At Ottawa the Parliament buildings and the various departmental buildings were not paid for out of current yearly revenues but are charged to capital account.

Our new Parliament buildings, our Asylum buildings, our Public Works, have all been paid for out of current yearly revenues, and without borrowing a dollar.

Railway subsidies at Ottawa are not charged to ordinary expenditures, but to an account which bankers call "Profit and Loss."

Our critics deem it fair that one rule should prevail at Ottawa and a different one here. They charge our Railway subsidies, our expenditures on Public Buildings, to ordinary expenditure, and in this way they seek to manufacture deficits.

Besides all these we must not forget that we have been able during the last three years out of our ordinary receipts to make large expenditures, not fairly or properly chargeable against them, of all of which the whole House approved. I will enumerate a few of them: Superannuated teachers, \$\frac{9}{53},300; Chicago Exposition, \$\frac{9}{11,750}; Mining development, \$\frac{9}{35},350; Inter-Provincial Arbitration, \$\frac{9}{56}.370; Algonquin Park, \$\frac{9}{17},-200; Rondeau Park, \$\frac{9}{10,980}; Good Roads Association, \$\frac{9}{7},260; India Famine Relief Fund, \$\frac{9}{6},000.

1897.—THE SURPLUS INCREASED.

I must now speak of the ten months of 1897, the full accounts of which we have before us. If our critics had waited until they had seen these accounts they would not have repeated their doleful statements that the Province is going behind.

On the first day of November last, 1897, we had to our credit in the banks no less a sum than \$724,882. We commenced this year with a credit balance of \$226,820, so that we have improved our position during 1897 to the amount of \$498,061, or nearly half a million of dollars.

Our total receipts during the ten months of this year were \$3,693,138, and our total expenditures \$3,200,218.

And during these ten months we have had large capital expenditures, such as \$157,495 for railway aid and to retire annuities, and \$86,269 for public buildings.

We had a credit cash bank balance at the beginning of this Parliament, January 1st, 1894, of \$1,000,016, and November 1st, 1897, near the end of the Parliament, we had in our banks \$724,882.

From January 1st, 1894, to November 1st, 1897, we expended for rail-way aid and to retire annuities over and above what we received from three sales of annuities \$381,284, and for public building \$1,064,192.

What an effective answer this is to the rash statement that the Province is going behind. Our credit cash bank balance of \$724,882 on November 1st, 1897, furnishes unanswerable proof of the highly prosperous condition of our finances. I must remind the House that honorable gentlemen opposite in their recent speeches have stated, with apparent glee and dramatic earnestness, that we would this year have a deficit of \$600,000.

The actual fact, as you will rejoice to know, Mr. Speaker, is that instead of a deficit we have on the ten months' transactions of this year a clear surplus of total receipts over total expenditures amounting to \$500,000.

What value can the public place hereafter on their statements or their predictions? Time and again I had assured the House that our estimates of receipts would certainly be exceeded, that in the past they had always been exceeded, that our actual expenditures would be kept well within our estimates, that this had always been done, and I gave illustratious from the experience of past years in support of my statement. And yet with no other foundation than the estimates, honorable gentlemen opposite have asserted that we would this year have a deficit of \$600,000.

I think, Sir, that I have clearly shown that ours is not a deficit-making administration, that we have always done our best to live well within our means, that we admirably succeeded in so doing, that we have been progressive, that we have avoided even the appearance of waste, that we have made the most of our resources, and that at the same time we have liberally and generously provided for every urgent public want.

One would imagine, Mr, Speaker, if he did not happen to know otherwise, that our honorable friends opposite were quite serious in their apparent abhorrence of deficits.

They can only manufacture deficits against our administration by ingeniously confusing expenditure on current account for ordinary services of the country, with expenditures on capital account, such as for new buildings or additions to buildings which now exist. These latter expenditures of course improve the position of the Province, and form additions to its assets.

DEBTS AND DEFICITS OF CONSERVATIVE GOVERNMENTS.

What about real deficits elsewhere? From 1894 to 1896, inclusive, part of the last period to which I have referred, there were deficits at Ottawa under their own Conservative rule amounting to \$5,694,758. Our critics opposite have always been silent as the grave concerning them.

In these same years 1894-1896 the deficits in the Province of Quebec amounted to \$2,529,404.

The Conservatives were in power at Ottawa from 1878 to 1896. During that time the debt of the Dominion was increased by \$150,760,-268, an increase of 86 per cent. in 18 years, or an average of more than \$8,000,000 a year. Quebec entered into confederation on equal terms with Ontario. The debt of the Province of Quebec to-day exceeds \$32,207,000.

The Dominion pays interest each year on its public debt to the amount of \$10,502,000, or more than \$28,700 a day. The Finance Minister at Ottawa out of every \$4.00 he receives pays more than \$1.00 to meet interest and interest charges on the public debt of the Dominion.

Quebec has to make annual provision for an interest charge alone of \$1,392,700; one third of all its revenues goes to pay interest on its debt. The city of Montreal has a debt of \$24,434,000, Toronto a debt of \$17,-397,000, Hamilton \$3,327,000, Ottawa, \$2,781,000 and London \$1,260,-000.

The Province of Ontario stands alone in this regard. Over and above its every obligation it has millions of dollars to the good; it is regularly in receipt of large sums of money representing interest on its invested funds it will have a clear surplus on this very year's transactions of \$350,000, and yet our critics cry out "direct taxation" and say that we are going behind.

THE WORK OF ADMINISTRATION ENLARGED.

A successful manufacturer in some particular year enlarges his buildings and spends thousands of dollars in new plant. He does not charge this large outlay against his business receipts for that year, and only an insane man would argue that the fact that he had converted some of his cash into new plant and buildings and thus lessened his cash capital, was necessarily evidence that he was going behind. Sane people on the other hand would contend that the fact that he was able thus to enlarge his business operations was the best of proof that his financial position was improving and that he was prospering.

The Province has year by year greatly extended its business operations in many and diverse lines of public usefulness, establishing at one time a Provincial Board of Health, at another a Bureau of Mines, and later still a Bureau of Forestry; aiding mining schools and dairy schools in the east and west and north; constantly initiating different branches and services, each of them helpful to the pursuit of agriculture; providing in a systematic way, through paid officials, for the preservation of game and fish; setting aside large reserves of forest lands for purposes of public parks; founding a well-equipped department for the care of waifs and neglected children; taking effective measures for improving the condition of our roads and highways; all of which of course necessitate increased and increasing annual expenditure. And all this and much more, Mr. Speaker, has been done without turning at any time a deaf ear to any meritorious plea for public aid, or neglecting in any way the old and time honored services which from its earliest days the Province has so liberally aided and encouraged.

THE PUBLIC ACCOUNTS.

I wish now briefly to refer, Mr. Speaker, to the Public Accounts which were yesterday presented to the House, inasmuch as my hon. friends opposite in all their campaign speeches have been complaining that our volume does not give sufficient details, and they point to the report of the Auditor-General at Ottawa as a model which we should imitate. We desire to make our volume, I need scarcely say, convenient for purposes of reference, and that it shall in a clear and lucid way and with sufficient detail furnish to the House and the people the year's financial transactions. Would a volume modelled after that at Ottawa more fully meet our requirements? I am confident that the average reader or student will give it as his opinion that our volume is much more convenient, more

Hon, gentlemen opposite will doubtless pay great respect to the opinions of their own leaders touching this very question. The views of the Hon. Mr. Foster, late Minister of Finance, and of his colleague Sir Hibbert Tupper are recorded in Hansard. They agree, it will be found, in condemning in most forcible and measured terms the very volume, viz., the Auditor-General's report, which our hon, friends opposite ask us to imitate.

Mr. Foster, in 1895, having stated that the audit, the Audit Department and the powers of the Auditor were based on the English system, complained that the Auditor-General in his later reports had departed from that system. Speaking in committee, Mr. Foster said:—"The English audit, and what was formerly the Auditor-General's audit, would simply give a statement of the salaries or disbursements, state what amount over or under the grant, and if at any time there was a theft of money or any wrong in any way, he would simply make a note of it and call the attention of the House to it. But this report goes very much further. It is a display of items which have nothing to do with an audit. Sir, you may look through the Audit Act without finding anything that forbids the Auditor-General to display all these items, but you will also find that the general tenor of the Act is to provide for an audit such as the Auditor-General first made. . . . If there is any over-expenditure or under-expenditure he is to make a statement of that fact, not to put down the details of every transaction with every Tom, Dick and Harry who happened to be paid for a pound of nails or a hundred feet of boards If the Auditor-General's report is to give the details of everything that is bought or sold, there ought to be alongside the specifications in each case. Otherwise we are led into difficulties in discussing the matter in this House. And if we, with our knowledge of the technique of these matters, are apt to be misled, how much more are the public into whose hands this volume may happen to fall likely to be misled? You have the generic name given in any case, but you may have a dozen species of that thing, varying in value by hundreds of dollars. Simply to give the name and the price, without any specification as to quality or anything of that kind, is really wrong information." And on another occasion Mr. Foster further said, "would it not be possible to have the volume made a little less bulky? My impression is that it largely defeats its object in being so bulky that it is almost impossible for a man to wade through it. For the convenience of others, does not my honourable friend think

something might be done to whittle down this volume? The accounts in it are very largely duplicated, as they appear in numerous cases, in the departmental accounts. And it seems to me the bulk would be diminished without lessening its intrinsic value."

Sir Hibbert Tupper took part in the same discussions and said, "It is a pity the Auditor General does not follow more closely the English practice. I have had several times occasion to look into the Auditor Gentral's Report over there, who has a vastly greater expenditure to examine into, and his report is smaller than ours. If he attempted anything like the system of the Auditor General of this country his volume would be enormous. An enormous part of that thick and bulky volume serves no purpose whatever. The sum the Auditor would require in order to have full transcript made of all the accounts in detail would be a sum that this Parliament would not for many a long day feel itself justified in granting. The work would be enormous. What is the use of printing pages of correspondence when their publication cannot in any way benefit the public interest?"

A CONCISE VOLUME.

Our last volume of accounts, that of 1896, contains 446 pages, and gives an abundance of detail. The corresponding volume for 1892 contained only 151 pages.

We do not copy out verbatim long invoices of goods of one hundred different kinds bought during the year for our public institutions and representing more than half a million dollars. To do so would treble or quadruple its size, would involve great expense, and as the ex-Finance Minister at Ottawa points out, instead of giving more information, it would be apt to confuse and mislead.

There are, I need scarcely say, many kinds, grades, varieties and qualities of the goods we buy, whether dry goods, groceries, or hardware, and unless in each case with the invoices we printed also an exact specification or description of the goods bought as to grade or quality, the reader would be no wiser than before.

The Ottawa volume gives no information as to the quality of the goods, and therefore, as the late Finance Minister has pointed out, the value of the volume loses rather than gains by its bulkiness.

OPPORTUNITY FOR INVESTIGATION.

Through our Public Accounts Committee every facility is given for examining the invoices themselves, for questioning and cross-examining

the Bursars of the various institutions who buy the goods, for definitely ascertaining their grade or quality, and for personal inspection of samples of the goods in question.

Indeed this has been done year by year, and faithfully done too, by our Public Accounts Committee.

In this way the minutest details of all our expenditures are laid bare before the Committee, and the Fress with a blaze of publicity gives them to the House and to the Country. What more can be asked for or desired? We cannot be far astray in following, as we do, the English system.

I would be glad if my honorable friends would examine the English volumes. While much less bulky than the Ottawa volumes, they of course present much larger transactions, involving expenditures thirteen times as large as those of Ottawa.

OUR AUDIT SYSTEM.

My honourable friend the Leader opposite has in all his recent speeches stated with apparent seriousness that we have no genuine or real audit of our accounts.

That one in his position should even think of making such a statement is simply astounding, and is clearest proof in itself that he feels compelled to go very far afield in order to find grounds for criticism.

No banker in this Province, no actuary, no accountant, no financier of any standing, will endorse his statement. I challenge him here and now to the proof. Each account which the Province pays, great or small, is scanned carefully by the Bursar of the institution for which the goods are purchased. The Deputy Minister or the head clerk of same department examines it, and lays it before the Minister in charge for his approval. The Assistant Treasurer, as well as another official of the Treasury Department, must then pass upon it. And all this is done before it reaches the Auditor.

The Auditor only certifies for actual payment, after first satisfying himself that the Legislature has appropriated money out of which this very account is properly payable. What other or additional check could my honourable friend devise? Why does he not give some practical suggestion?

It is not even hinted at that the Auditor, who has been many years in the service, is not diligent, capable, or efficient. No one has ever questioned his integrity, nor accused him of being a partisan. He is not appointed by the Government. He holds office during good behaviour,

and is removable only for cause on address of the Legislative Assembly. He has able experienced assistants, and the highly important work of his office, down to the minutest detail, is done faithfully and well.

SALES OF TIMBER.

My honourable friend, the Leader of the Opposition, loudly complains that we have spent millions of dollars which we have received from the Crown Lands Department, and he goes back to 1871 and counts the millions. What would he have us do with these receipts? We treat them as ordinary revenue. They are so regarded everywhere. How else could we regard them? Have his friends when in power treated them differently? Sir Charles Tupper was a member of the Nova Scotia Government from 1857 to 1860, and again from 1863 to 1867. Sir John Thompson was a member of the same Government from 1863 to 1867. Each of them treated the revenues of the Crown Lands Department, the proceeds of the sales of Crown Lands as ordinary revenue. The Dominion Government has invariably followed the same practice. He further alleges that we have disposed of our timber wealth in a prodigal way. That this is very far from the truth everyone knows.

The Macdonald Government sold 635 miles in four years. We have sold 4,393 miles in 25 years. The Macdonald Government realized \$260 per mile, while we have obtained \$1,222 per mile. The Dominion Government, one might fairly say, has given away its timber limits. We invariably sell at public auction to the highest bidder. The Ottawa limits have passed into the hands of political favorites secretly without bidding or competition and for only nominal prices. We are compelled, through forest fires which occur from time to time, to sell the limits. In 1896 for example, a large quantity of timber estimated at more than sixty millions of feet was so seriously damaged by fire as to compel us to sell it in order to get for the Province some value out of the burnt territory. At best there was a serious loss. Similar fires have occurred on the north shore of Lake Huron on different occasions, necessitating like sales. We spend considerable sums to prevent fires and employ fire rangers for that purpose.

In a doleful way our friends opposite complain and predict that our timber wealth is being rapidly exhausted.

They have prophesied on this line for long years past, yet our Crown Lands revenues have shown no signs of diminution. With the same care and prudent management which have been exercised in the past, our Crown Lands revenue will not fail us for a generation yet to come. From

1871 to 1896 a period of 26 years our average annual receipt from this source has been \$978,264. I will not pursue the subject further, since the Commissioner of Crown Lands intends to deal with it fully before the session closes.

	Surplus of Assets after deducting Liabilities presently payable		10

A few remarks, Mr. Speaker, as to our Assets and Liabilities. Our Hon. friends opposite, always dealing in vague generalities, will never condescend to particular or exact statement. They have recently committed themselves to assertions concerning our assets which are utterly unfounded, utterly without warrant

Some of our assets are Investments in Drainage Debentures amounting to \$367,068; Trust and other Funds held for us by the Dominion \$6,200,018; Cash on deposit in our Banks \$724,882, making a total of \$7,291,968. Deduct from this the amount I estimate to be due to the Dominion on open account, viz., \$2,000,000, and the other liabilities named in the Schedule in the hands of Hon. Gentlemen, viz., \$33,644, and we have as our surplus of cash assets the large sum of \$5,258,324. (Applause.) This statement, save that it does not include all our assets, is absolutely correct. Will any Hon. Gentleman point out to me now where I am in error? I am fully prepared to sustain my statement.

CONVERTIBLE INTO CASH.

We can sell these Drainage Debentures at any time for more than their face value. I have therefore under-rated that asset. As to the five items, viz., the three Trusts Funds, the Upper Canada Grammar School Fund, the Upper Canada Building Fund, and the Land Improvement Fund, the Capital under the Dominion Act; 1884, and the Common School Fund there cannot be a particle of dispute. They amount altogether to \$6,200,018. The Dominion Government, the Quebec Government, the Arbitrators, all concur in the amount and concede our ownership of them. Moreover the Award of Nov. 2nd, 1893, declared the Trust Funds to be

unimpaired and intact. Further, we have always and regularly received interest on them at the rate of 5 per cent. half yearly. As I have already said, and as our Public Accounts show, we received from the Dominion Government this very year \$212,414 as interest on these items.

We must certainly have a large capital fund, a large capital asset somewhere from which we derive all this interest. The Finance Department at Ottawa credits us with the ownership of these Funds, and regularly pays us the interest upon them. We could not reinvest them at the same rate of interest, so that it is best for us that they shall remain as they are. Will my Hon. friends opposite ask why our interest receipt is less than it was formerly? If any one were to ask the question it would show that he had given the printed statement which is on our desks, and which has been given to the Press, at best only superficial attention. It will be noticed that I have stated that we estimate that there is due to the Dominion on the open account between the Province and the Dominion a balance of \$2,000,000. The Finance Department at Ottawa in remitting the half yearly interest it owes us, deducts an amount sufficient to pay interest on this balance. We are credited with the full interest as always heretofore, and this deduction is made for the reason given.

Will our critics say that this is only an estimated balance, that it may in reality be larger? I reply that we have always under-stated rather than over-stated our case, and the past is full of instances showing that the contentions of this Province are correct in nineteen cases out of twenty. The Courts have upheld our contentions in nearly every instance. Our credit balance in the banks is of course not open to dispute. I repeat therefore that my statement is unquestionably correct.

OUR RAILWAY OBLIGATIONS.

We have only one other obligation or species of obligation of any kind to which as yet I have not referred, viz, our Railway obligations. These are spread over a period of 40 years. Their present value, if we were called upon to meet them all to-day, is \$2,769,358. Even if we should deduct this amount from our cash surplus, and as I will presently show, there are the best possible reasons why I should not deduct it, we would still have a cash surplus of \$2,488,966. Even if I closed my case here, might I not well say that we have good reason to be proud of our financial position? What other province or country similarly circumstanced can show, all things considered, a brighter balance sheet? But I should not close my case here, inasmuch as the statement I have thus far given is unfair to the Province in several particulars.

I stated a moment ago, Mr, Speaker, that the assets I named were only some of our assets. Not to mention these Parliament Buildings costing \$1,300,000, and our other buildings such as the nine Asylums costing \$4582,000, and these are good assets which every monetary institution, banking house, insurance company, or other corporation invariably, and rightly too, include when presenting their annual bilance sheet to their shareholders, let me speak of one or two other assets which are worthy of special mention.

We have unpaid balances due the Province on account of sales of Crown Lands to the amount of \$785,000. The amount is being yearly reduced by payments. This is unquestionably a good cash asset. Then we have the site of the Old Parliament Buildings, and some other lands in the City which the Legislature authorised us to sell, the proceeds to be applied towards the erection of these new Buildings. These constitute an asset, readily realizable when the times will improve, well worth, I am informed, \$250,000. We also own the north-west corner of Queen and Yonge Streets in this City, which yields us a rental of \$4 000 a year, and which therefore is worth at least \$100,000.

I contend, Mr. Speaker, that we should not deduct from our Surplus the present value of the Railway obligations, not only because we have good assets such as the two I have just named, which would more than counterbalance them in amount or value, assets which are not included in the printed statement on our desks, but also and mainly for other reasons.

No government, so far as I know, classes such obligations as these Railway obligations, as part of its ordinary public debt. I challenge Hon. Gentlemen opposite to cite a case to the contrary. Why should they seek then, contrary to all precedent, contrary to the practice which has long prevailed at Ottawa, and adopted by their own leaders there and elsewhere, to apply alone to this Province a rule which no other country adopts?

A word, Mr. Speaker, about the nature of these railway liabilities.

The Legislature in effect says to railway promoters when approving of a grant to a proposed road, "We cannot give your 20 or 30 or 50 miles of railway, as the case may be, a cash subsidy of \$3,000 a mile, since no country out of its ordinary yearly revenues could in addition to providing for all its ordinary wants, be expected to pay such large sums in cash, but since it is our duty to assist as best we can and as far as we can in developing the newer portions of the Province, we will give you the exact equivalent viz., \$699.60 for every ten miles of road you will build each half year

for 40 years. And this payment is given in the form of a railway certificate. It must be remembered that we have paid out in cash for railway aid since 1872, an average of \$258,000 a year.

In issuing these 40 year certificates, then, which make up our railway liability, we simply declare that we will be able year by year to pay the one-fortieth part of the Railway Aid the House may see fit to vote from time to time.

These railway certificates then are liabilities just as our yearly appropriations for Education, for Agriculture, for Hospitals and Charities or Asylums are liabilities, and not otherwise.

Our critics therefore migh; as well capitalize our yearly grants for Education and Agriculture, and call the capitalized sum a provincial debt.

The Province will never disavow its obligation to give large yearly aid to Education or the promotion of Agriculture or the support of its insane.

My position then and my argument in a word is this, that while these certificates, these future annual payments are of course liabilities, they by no means stand on the same footing as a public debt, but that they are exactly like our other necessary payments of annual occurrence such as the grants to Education, or to Agriculture to which I have alluded.

But further, if it be fair to capitalize these certificates against us, then it is equally fair to credit us with the amount of the capitalized value of all our fixed receipts such as our Dominion Subsidy, or the interest on our Trust Funds.

And these fixed receipts are guaranteed to us not for forty years only but for all time to come. To do this would be to increase our surplus of cash assets by many millions. There is no middle course to be followed.

The cash surplus at the very least is what I have stated it to be. I might well add to it, as I have already indicated, the amount of the outstanding balances on Crown Lands, viz.: \$785,000 and the value of the site of the old Parliament Buildings, say \$250,000, and also the Yonge street property which is worth \$100,000.

If the annuities and railway certificates, which are payments of annual occurrence, similar to our payments in aid to schools and asylums, are to be capitalized and placed on the debit side of our ledger, then our fixed receipts such as our subsidy and the interest on our Trust Funds should also be capitalized and placed on the credit side of our ledger.

THE INTER-PROVINCIAL ARBITRATION.

Last February I informed the House of the progress made during the previous year in adjusting and settling the matters in dispute between the Province and the Dominion.

It will be remembered that although Ontario had succeeded against the attempts of the Dominion to charge Ontario solely with the augmentation of the annuities to an amount of \$4 per head payable to the Indians of Lakes Huron and Superior out of the Revenue collected from land and timber sales of the Territories surrendered by Treaties in 1850 to the late Province of Canada, yet I anticipated that the Dominion intended to formulate a new claim against Ontario and Quebec conjointly to cover the amount of such augmentation. Under the Treaties of 1850, the amount payable to the Huron Indians was \$2,400 per annum and to the Superior Indians \$2,000 per annum, the capitalization of which is included in the debts of the late Province, subject to augmentation to \$4 per head in the event that such increase could be paid without incurring loss.

The Dominion Government has since 1874 paid such augmentations at sums varying annually from \$10,764 in 1874 to \$16,204, in 1892, up to which year the claim is brought down before the Arbitrators pursuant to the deed of reference, and having failed against Ontario, is now renewed against Ontario and Quebec conjointly.

The case of the Dominion so renewed was filed on 25th January, 1897. The answer of Ontario was filed on 24th March, 1897. The answer of Quebec was filed on 15th November, 1897, and was argued at Quebec on the 18th, 19th and 20th of November, on which occas on Ontario had the advantage and benefit of Mr. Blake appearing on our behalf.

It is expected that the Arbitrators will give judgment on the 7th January next.

The House, it will be remembered, was on 18th February, 1897, informed of the position of the Award of 6th February, 1896, relating to the Common School Fund and the Upper Canada Land Improvement Fund.

Quebec had attempted before the Arbitrators to set aside the provisions of the Award of 1870 made under the British North America Act, whereby the Upper Canada Improvement Fund had been assigned to Ontario. Ontario had not sought to disturb the provisions of that award which with much injustice to Ontario, as it seemed, assigned to Quebec a considerable share of the Common School Lands of Ontario.

Quebec so attempting to disturb the Award of 1870, in a matter which was favorable to Ontario, left Ontario no alternative than to raise the question whether the Award of 1870, wherein it was unfair to Ontario, was not illegal.

These questions were thus made subjects of separate appeals by Ontario and Quebec against the Award of 6th February, 1896, to the Supreme Court, before which Court they were argued at Ottawa on 2nd, 3rd and 4th of November, and on this occasion also Ontario had the benefit of Mr. Blake's advocacy. Upon these appeals, judgments may be expected to be delivered in February next.

The respective judgments of the Arbitrators in respect of the Indian annuities, and of the Supreme Court in the matters of the Common School and Land Improvement Fund, may be the subject of appeals, but if not, then in both cases accounts relating to actual expenditures, etc., may have to be taken. In the Indian cases, in order to determine that Indians duly entitled only have been paid, the pay lists may have to be scrutinized, and to ascertain that sufficient has been collected to pay the augmented annuities without incurring loss, it will be necessary to settle the amount of expenditure made in developing the territories.

The Arbitrators in January next will give directions, which will permit these accounts to be readily taken.

In the case of the Common School and Land Improvement Funds, Quebec will have the right to examine the accounts and the administration of the collections by Ontario on lines laid down by the Arbitrators.

At the sitting of the Board of Arbitrators on the 15th of March last, the Board determined Ontario not to be liable to the Dominion for the salary of the Solicitor-General for Upper Canada for services alleged to have been rendered for some few months after Confederation, and the Arbitrators also determined that the Board had not jurisdiction to deal with a claim by the Dominion against Ontario to recover the proceeds of a recognisance given by sureties for the due forthcoming of an officer of the Inland Revenue Department of Canada who, being arrested on a charge of felony, was released upon condition that he should appear to answer the charge. Having made default, the recognisance was duly estreated, and proceedings in respect thereof were had by which \$3,000 was received by the County Attorney and paid in to the treasurer of Ontario.

Six claims were also put forward by the Dominion against Ontario and Quebec in respect of payments made after Confederation, on works connected with the Parliament Buildings at Ottawa and Rideau Hall.

These cases were partly heard in March last and now stand over until January at the instance of the Dominion for further discussion.

These matters when closed will bring the work of the arbitrators almost to an end. There is one Indian case left open, between the Dominion and Ontario, which cannot properly be discussed until certain questions have been decided in a case now standing for judgment before the Judicial Committee of the Privy Council. The above mentioned Indian cases, School and Land Fund cases being about to be finally concluded as above explained, the remaining work is to strike balances in the various accounts.

1. The Province of Canada account with the Dominion.

2. The Ontario account with the Dominion.

CITECTEN

3. The account between Ontario and Quebec relating to the Common School Fund.

Questions of difference have already arisen as to the manner in which the accounts generally are to be stated, and as to the various dates from which interest is to be calculated, and as to the mode of computation of interest. An attempt was made at Montreal on 15th March, 1897, to have these questions discussed but without being able to proceed far, as the Province of Quebec, in view of the near approach of their provincial elections, were desirous to postpone the matter, and in some aspects the discussion seemed to be premature.

Hon. Gentlemen will notice that we estimate that we will receive during 1898 \$3.313.372. I am confident that the yield from Succession Duties will greatly exceed that of any previous year. The Crown Lands Department will give us its average receipt and, perhaps, somewhat more. The other sources of revenue will, at the least, equal their past contributions.

Our total estimated expenditures aggregate \$3,397,767. We need more for Education and for our Asylums than we asked last year. It must always be borne in mind, however, that our actual receipts invariably exceed our estimated receipts, and that our actual expenditures are always considerably less than our estimated expenditures. This has been the case without a single [exception for several years past. We spent last year \$143,587 less than our estimates. We may, therefore, beyond any doubt expect a comfortable surplus of total receipts over total expenditures arising out of our financial operations for the year 1898.

OUR FINANCIAL POLICY.

Time and again the electors have deliberately approved of the financial policy of the Government. It is well defined and easily understood. There is nothing vague or uncertain about it.

It is, in a word, a policy of true economy, efficiency of service, of advancement and of progress.

We recognize fully that the needs of a young and growing Province must inevitably and constantly increase, and that to meet these needs in a suitable and timely way, an increased expenditure will inevitably be necessary.

At the same time we know that we must carefully husband all our recources, that we must guard and preserve our forest wealth, that we must, whenever and wherever possible, foster and encourage the all important industry of Agriculture, that we must make the most of our mines and liberally assist in their development, and that we must prudently avail ourselves of such sources of revenue as are legitimately ours.

Nor must we ever forget that the most careful economy and it alone, can successfully bridge over the gap which, in most countries too often exists between Receipts and Expenditures, and which the keen activities of all modern life, private and public, constantly tend to widen.

What is the financial policy of Hon. Gentlemen opposite? Their recent speeches indicate plainly that they have no policy to offer which is either tangible or useful. They have utterly failed to destroy and they are equally powerless to construct.

They find fault with our large Crown Lands collections; they complain that we do not give a larger share of license revenues to the municipalities, although other governments keep it all; guided by geographical considerations, in certain localities they condemn Succession Duties, and in other localities faintly approve of them, and at all times they speak of our invested funds as if they were a mere myth, although they know that they regularly yield us large sums of interest half-yearly.

Without this interest, without license receipts, without Crown Lands receipts, whence would we derive our revenue?

In one way only, viz., by direct taxation. I say, therefore, Mr Speaker, to honorable gentlemen opposite, that if their speeches mean anything, they conclusively prove them to be the open advocates of direct taxation.

Either this, or they are driven to a policy of retrogression. Will they lessen the grants to education, to agriculture, to asylums and hospitals? If they cut off our revenues or lessen them, they are driven to this extremity.

Or is it their policy to compel the municipalities to take care of their own insane, their blind, their deaf and dumb, and their weak-minded?

Will they say to the municipalities for example, "We will no longer encourage the erection of County Houses of Industry by contributing \$4,000 to each county which will make suitable provision for its infirm and destitute, since our revenues will not admit of it?"

What officials will they cut off? Will they dispense with the services of the Municipal Auditor recently appointed, or the Inspector of Roadmaking, or the head of the Forestry Department? I repeat that if their recent deliverances mean anything they plainly point to some such backward and retrogressive policy as I have just outlined.

Between the two policies the electors of the Province will soon be called upon to choose.

On this side of the House at any rate, with fullest confidence we await the verdict.

I move, Mr. Speaker, that you do now leave the chair.
