BUDGET ADDRESS DELIVERED BY THE HON. GEORGE S. HENRY PRIME MINISTER OF ONTARIO ACTING FOR THE HON. E. A. DUNLOP TREASURER OF ONTARIO

March 23, 1933

MR. SPEAKER:

\*

In rising to move that the House resolve itself into Committee of Supply, I desire to present the annual financial statement of the Province for the year ending thirty-first October, 1931, and also a forecast of the activities of the Government, particularly in relation to receipts and expenditures for the present year ending thirty-first October, 1932. This is my twentieth session in the House, and I have been privileged during these twenty years to play a good many different roles—as a private member, and then as Minister of Agriculture for a short season,-a year or so-until our friends, The United Farmers of Ontario were elected to office in 1919. Then we had over three years in the cold shades of Opposition. I want to say candidly, I do not know why the shades of Opposition should be dubbed as cold, or even called shades, because after all there is a freedom on the part of the Opposition from responsibility. They can enjoy themselves in the public business of the Province, and change their views almost from day to day, certainly from year to year, and no one particularly criticises them for it. So that I am not altogether agreeable with the term usually used with regard to Oppositions. I therefore feel rather envious of the two gentlemen who sit opposite, free of responsibility and able to

criticise without anyone seriously taking them to task, no matter what their attitudes are from time to time.

However, when the former Prime Minister was forming his Government in 1923 he said, "Henry, I do not think we will take any more chances with you in the Agricultural Department. We will turn you into something more rough and ready." And then I was honoured with a seat at his Board as Minister of Public Works and Highways. They were Departments that I naturally enjoyed, because if there is one thing more than any other that appeals to me, it is getting things done. It is true the other departments lend themselves to that, but not so readily. The labours are longer and more arduous, and the results not so apparent. I enjoyed my activities for seven years in the Public Works Department. I was identified a good deal with the construction of buildings throughout the Province. I am particularly proud of the building we have on the east side of the park. It is constructed of Canadian materials almost entirely, and designed and supervised in its construction by the department's own architects.

And then I have, I presume, some reason to be proud of the work that has been done in the Highways Department.

## **EDUCATION DEPARTMENT**

I have had some experience with the Education Department from time to time, while I was Minister of the other Departments, when the Prime Minister was absent from the Province. That is possibly the most important department in the entire public service. I was not present in the House when my honourable friend from Centre Simcoe was speaking, but I notice from the column "Under the Gallery Clock" that he is casting longing eyes on the Education Department, and that if a change of Government is due and happens, that possibly he will be called to that very onerous task. I want to say, though, so far as the Education Department is concerned, I do not feel that it is being neglected, because I am Minister of Education and Prime Minister of the Province at the same time. My predecessor, for the seven years he was in office, presided in a most adequate way, in a constructive way, over the destinies of that Department, and kept pace

with the times in the development of the system. I feel that the same thing may be said of the Department at the present time, even though we are passing through periods of trial and difficulty when development does not naturally go forward very rapidly. I feel confident of that because the Department is manned with a very high type of officers. The Deputy Minister, Dr. Colquhoun, with Dr. Merchant as Special Advisor and Mr. Rogers as Chief Director, is a triumvirate of specially able men who are constantly in touch with me, advising me as to the policies of the Department, and what can be done to improve our conditions and direct education along progressive lines.

#### INDISPOSITION OF PROVINCIAL TREASURER

This afternoon, I appear before you, Mr. Speaker, in a new role, and I regret exceedingly that the Minister of the Department, the Honourable Mr. Dunlop, is not able to be present to deliver this address in his own manner, in the characteristically clear, concise and business-like style which has done honour to himself and credit to the House on the occasions on which he has addressed us. I am pleased to state, however, that Mr. Dunlop is rapidly recovering from his indisposition. I had some two hours with him a night or so ago, and he is very active and interested in everything that is being done, and I think he identifies himself personally with everything I may say this afternoon, because I carefully ran over what I had in mind and he was good enough to suggest some additions or elaborations. Therefore I feel that he is in company with me speaking on the subjects that are under review.

7

#### **UPPER CANADA FINANCES OF 1832**

Now, Mr. Speaker, there has come into my hands by accident a document which I think will be of interest to the House because of its character. It is a statement of the estimated receipts and expenditure for the Province of Upper Canada in the year 1832, presented to the House of Assembly in 1833. The items are in what was known as Canadian Sterling and were as follows:

# Resources of the Province of Upper Canada Estimated for the Year 1832

From	The Canada Company for Crown Reserves	£17,500	
	Timber cut on Crown Lands	3,420	
	Proceeds of Sales of Ditto	1,400	
	Rent of Crown Reserves	280	
	Jesuits Estates in Lower Canada	335	
	Survey Fees, Fees on Patents, Leases, Fines, For-		
	feitures and Seizures, and Rents of Mills and		
	Ferries	3,000	
	_		£25,935
	Welland Canal	£1,500	~=0,200
	Burlington Bay Canal	1,500	
	Kettle Creek Harbour	200	
	Oakville Harbour	200	
	York Light House	175	
	Bank of Upper Canada	3,000	
	Bank of opper canada	0,000	6,575
	Duties on Imports at Quebec	£37,600	0,515
	Duties on Imports at Quebec Duties on Goods, Wares and Merchandise, and	201,000	
	Salt imported from the United States	6,390	
	Licenses to Hawkers, Pedlars and Auctioneers,	0,390	
	and Duties on Auction Sales.	3,500	
	and Duties on Auction Sales	5,500	17 100
			47,490
		CALCER S	£80,000

# Estimate of Expenditure of the Province of Upper Canada for the Year 1832:

Officers of the Legislature	£ 840	
11 District Schools	1,100	
Adjutant-General's Establishment	650	
Inspector-General's Salary	406	
Receiver-General's Salary	778	
Common School Appropriations	2,000	
5 Pensioners	100	
Interest on Public Debt	8,565	
Contingencies of the Legislature	4,500	
Militia Pensions	1,000	
Light Houses	350	
Permanent Salaries (1 Will. IV, Chap. 14)	7,223	
Civil List Estimate	8,629	
Balance, or Surplus, for the Redemption of the Public		
Debt, etc., etc	43,859	
		£80,000

# The Public Debt of Upper Canada

For	Militia Pensions	£25,000	
	Service of the Year 1824	16,000	
	Burlington Bay Canal	17,250	
	Welland Canal	150,000	
	Kettle Creek Harbour	4,000	
	Oakville Harbour	2,500	
	Roads and Bridges	20,000	
	-		234,750
	Of which is Redeemed		42,000
	Leaving a Balance of	£	2192,750

You will see from this that out of total receipts of  $\pounds 80,000$ no less than  $\pounds 43,000$  was applied to the reduction of the debt. Apparently one hundred years ago they had some thought of retiring the debt and living within their means.

No matter what our political leanings may be we have certainly got a long way in the hundred years from using one-half of our receipts to retire the debt that has been incurred.

#### ANNUAL FINANCIAL STATEMENT

Now I want hurriedly to go over the statement of our financial activities during the last year, closing with the 31st of October last. I am giving the round figures, omitting dollars and cents. The total revenue was \$54,175,000, and the total expenditure, leaving out certain special items I will mention later, was \$52,173,000. This was all in ordinary account. This leaves a surplus of \$2,000,000 to our credit. The special accounts which we were not able to anticipate were in the Attorney-General's Department, \$357,000 which had reference to certain fines that were considered our own but the Courts decided they belonged to the municipalities. Then there was the item of relief, a special item surely, of \$808,000. In the Welfare Department there was an item of \$567,000 that had been considered in the previous statement for 1931 as an Account Receivable. In correspondence and discussions with the Ottawa authorities in the varying of the percentage that Ottawa was assuming, from 50 to 75% in relation to Old Age Pensions, there was a date fixed which subsequently was changed to three months later. This \$567,000, which we considered a Bill Receivable at the time of the last statement dealing with the 1931 accounts, was not paid. It represents the difference between the Dominion contribution of 50 and 75% for three months. The other item is a matter of exchange on maturities in New York, and is \$2,330,000. Those items make a total of \$4,062,000 and change what would have been a surplus of Two Million Dollars into a deficit of Two Million Dollars.

9

#### **EXPENDITURE REDUCTIONS**

Now during these times we have been seeking to economize and I want to point out to the House we have been fairly successful in the ordinary expenditure exclusive of Public Debt charges. Leaving that out, in 1932 we cut down our expenditure by \$4,350,000.

It may be interesting to the House to read some of the major reductions that have been made in the carrying on of the business of the Province by the various Departments. The Legislation was reduced \$29,230; Attorney-General, \$234,204; Education, \$913,844; Lands and Forests, \$295,347; Mines, \$44,393; Game and Fish, \$63,604; Public Works, \$144,980; Highways, \$368,996; Health, \$217,759; Public Welfare, \$1,316,534; Provincial Treasury, \$118,622; Agriculture, \$506,093; and Provincial Secretary, \$159,796. This shows how definitely we have been striving to get somewhere in the way of economy in operation and cutting down services we could not afford due to the conditions through which we are passing.

10

## **REFORMATORIES AND INDUSTRIAL FARMS**

Upperson Theorem is Department, 5357 Unit-which Theorem 1980

It is interesting here to show also the effort made in the Reformatories to reduce materially the cost of maintaining those who are in our charge.

The large decrease in expenditure at the Mimico institution in 1932 was due to the fact that tile bought by the Public Works Department in 1931 was not paid for until 1932, thus cutting down the per capita cost. In studying the returns from the Ontario Hospitals there is a marked difference in the character of the care that is being given. There is an increase over the nine or ten years of from something like 8,000 patients to 11,000. The cost has been reduced somewhat but it does not stand out as markedly as in the penal institutions because there is a different character of care being given, and the number of medical staff in relation to the population is much greater. A statement illustrating the above follows:

#### THE ONTARIO REFORMATORIES AND INDUSTRIAL FARMS

#### The Department of Provincial Secretary, Public Institutions Branch

Average maintenance cost per day for the five institutions, year 1923 compared with 1932

(Based on the actual expenditure as it appears in the Public Accounts)

	1923		1932	
initiative of the selection of the selec	Total Days' Stay	Per Capita Cost	Total Days' Stay	Per Capita Cost
Ontario Reformatory, Guelph Ontario Reformatory, Mimico Mercer Reformatory, Toronto Industrial Farm, Burwash Industrial Farm, Fort William	182012 27740 55120 108135 16790	\$ 2.2510 3.1116 2.0154 1.7583 2.3323	319812 77699 64141 187475 34385	\$ .6842 .1223 .9287 1.4565 1.3400
Average Per Capita Cost		2.1457		.9063

#### **GROSS DEBT**

Now I want to talk to you about the Gross Debt. There is a great deal said about the climbing debt of the Province and in that criticism I have no doubt is the suggestion that there has been wild extravagance in the administration during the last nine years, and that we have nothing to show for the money that has been invested in a capital way. I have made a study of the last three administrations in relation to the increase in debt. In 1919, when the Honourable Mr. Drury and his friends took office, there was only \$97,000,000 of debt, and when Mr. Drury left office the debt was \$291,000,000 or an increase of 194 millions. That money was not all spent in unproductive development, and I want to be fair to my predecessor who had charge of the affairs of this Province for four years. In realizable, and income producing assets, there was chargeable to Hydro \$76,659,000; to T. & N.O. Railway, \$5,740,000; Agricultural Development and Housing Loans, \$10,385,000. I think that amount includes some items towards drainage and other items-and a cash balance of some \$10,600,000 in the hands of the Treasury

because they had borrowed possibly beyond needs. That with accruals of some \$2,000,000, is a total of realizable revenue producing assets of \$106,000,000 which were invested in this Province during those years. In road development in northern and southern Ontario there was a matter of \$55,532,000 which is classed by officials of the Treasury as a non-realizable but revenue producing asset. The investment we have made in roads has been justified and while the amounts are large and possibly with the experience to-day we should be inclined to say we had gone faster than we should, yet there is no use criticizing one or the other because all were interested in the development and when we were enjoying prosperity none was anxious to retard it. In the non-realizable and non-revenue producing class there are Lands and Buildings, \$7,764,000; Public Works, \$1,244,000; Bond discounts, \$1,932,000; and Extraordinary, \$7,604,000. This last item was somewhat criticized by some of us who were in the House during the Drury administration. My honourable friend from South Ontario, and particularly my friend from Bruce, will remember the short column which was introduced in the Public Accounts and termed "Extraordinary."

It is a plain statement of the figures I am giving you which will enable the average man of this Province to read the Public Accounts intelligently and have a knowledge of what the whole matter means."

Then in deficits during the Drury administration there was a matter of \$14,251,000. The grand total of expenditures for which no revenue producing assets were created works out, after deducting various small items, to \$31,130,000, about one-half of it being deficit, they having failed in fairly decent conditions to balance the Budget.

We have then the following increase in debt:

Realizable	\$106,129,000
Non-realizable—Roads	
Various	31,130,000
	A102 001 000

Total.....\$193,991,000

Now let us take the experience during the following nine years, over double the period. To have spent at the same rate as the Drury Government we should have increased the

debt by \$400,000,000. The actual increase is \$281,000,000; that is from \$291,000,000 to \$572,000,000. The items in realizable producing assets are:

Total	 \$104,768,000
Hydro T. & N.O. Railway Agricultural loans	 2,133,000

In non-realizable but revenue producing assets there are roads, \$111,951,000. Other items, because I want to make the comparison as fair as I can, are:

Lands and Buildings	\$21,034,000
Public Works (bridges)	2,405,000
Rural Hydro	6,739,000
Relief Works	5,872,000
- Total of	\$36,050,000

The item on Rural Hydro is to the credit of the present administration and the one that preceded it.

Then we have direct relief, \$3,139,000 and Bond Discounts, \$11,126,000. It is the usual custom in the sale of bonds to sell them something below the par value. The general argument is that it is safer and you are apt to get a higher price than if you issue them to sell at par. My honourable friend from North Bruce will appreciate what the habit is. There were bond discounts of \$11,000,000 and a net deficit in the nine years of \$8,807,000 and other items which make up a total of \$64,821,000. This figure favourably compares with the figure of the Drury Administration of \$31,000,000. The realizable assets were about the same in each case, \$106,000,000 for four years and \$104,000,000 in nine years. and the non-realizable but producing assets, \$55,532,000, in the case of the Drury Administration; and of \$111,951,000 during the administrations which succeeded him.

That is a fair and reasonable comparison and I think it is an adequate answer to those who go on the hustings and talk about the extravagant administration carried on during the last nine years without telling the other side of the story in relation to where the money has gone and to what purposes it has been put.

#### **PROVINCIAL BORROWINGS**

There was considerable discussion last year with regard to the issue of bonds and the improvident character of the administration and how reckless we were with the people's credit. I want to draw to your attention what happened this last season. Early in July we were advised we were carrying rather too many short term Treasury Bills for the unsettled condition of the market so we tried a novel feature, -absolutely new in any Province of Canada as far as I know. We determined to sell Twenty Millions of Dollars over the counter, not making any arrangements with any bond houses, banking institutions or otherwise, but merely advertising we were going to sell at a certain figure Twenty Millions of Dollars, and asking the people to come in and buy. We intimated at that time we would pay banks, brokers and other financial institutions who cared to come in and purchase from us, one per cent. on the issue. I have a Schedule of some issues during 1932 by various Provinces and Cities where the commission to investment houses runs from two per cent. in the case of a large city to 3 per cent in the case of a Western Province.

We established a record for any Province in Canada. They were readily saleable, giving evidence of the confidence of the people of this Province and elsewhere in our financial stability and in our capacity to carry on and deal with the affairs of the Province.

#### **OLD AGE PENSIONS**

I have here another short schedule which is very illuminating to the people of this Province. I think the Minister of Public Welfare touched on it somewhat in dealing with his bill. It is as follows:

Up to the present time, six Provinces have adopted the Act and the tabulated figures below show how five of them have applied it up to the end of September, 1932.

ei si simile Lama nos	Alberta	British Columbia	Mani- toba	Ontario	Saskat- chewan
Number of pensioners	3,912	6,031	6,600	39,925	6,812
Percentage over 70 years to total population Percentage over 70 years	1.17	1.84	1.68	3.48	1.17
receiving pension	50.67	54.84	58.25	34.56	66.32

It will be noted from the above figures that the percentage of those over seventy receiving pensions in every other Province is much in excess of the percentage in Ontario.

The total number of pensioners on our Ontario Pay Roll on 31st October, 1932, was 41,658 and the total amount paid in pensions for the last fiscal year was \$9,089,000. The Provincial proportion of this expenditure was \$1,443,262.32, plus adjustment of \$567,120.25, a total of \$2,010,382.57; the municipalities contributed \$825,555.79, and the balance was paid by the Federal Government in Ottawa.

Since the Pensions allowance to aged people over seventy is not awarded if there is an income over \$365.00, the comparative statement quoted above shows that in Ontario a much higher percentage of the people have made provision for their old age than in other Provinces. That is a remarkable statement, Mr. Speaker, and I think it should be appreciated by the people in the Province. Personally, I am proud to feel our people are in a position to look after themselves to such a large extent.

# **MOTHERS' ALLOWANCES**

Now I am also proud of our record with regard to Mothers' Allowances, and I feel we are taking care of the homes and maintaining the mother and her children that they may be brought up in a normal way and be able to get an education. The Provincial contribution for 1932 was \$1,455,000 and the municipalities contributed \$1,234,000.

In	1930	the number	of mothers	s receiving	assista	nce w	as 5,623
"	1931	"	"	"	"	"	5,997
"	1932	"	"	"	"	"	6,228
"	1930	"	children	"	"	"	16,908
"	1931	"	"	"	"	"	18,036
"	1932	"	"	"	"	"	18,644
In	1930	the percent	tage cost c	of adminis	tration	was	3.54%
	1931	"	"		•		3.31%
"	1932	"	"	6	6	"	3.08%

This is an indication of the economies we are practising in regard to this part of our public welfare services.

#### FREE WELFARE SERVICES

Now, Mr. Speaker, there is a great deal said about our want of consideration for those who are needy, and I have therefore had a schedule prepared showing something of what we in Ontario are doing in the way of free public philanthropic services.

I think these figures speak for themselves, justify the expenditures, and entirely answer hostile criticisms.

This is an era in which practically all of us are interested in the welfare of our fellow men, and the sociological work of the Government of Ontario is so remarkable that I think it worth while giving considerable detail concerning it. The figures are as follows:

#### NET COST OF FREE SERVICES AND GRANTS FOR PUBLIC WELFARE—1932

	Province	Munici- palities	Dominion	Total
HEALTH— Laboratories Mental Hospitals For support of Indigents in	2,996,000	\$ 	\$ 	\$ 127,000 2,996,000

17

# AGRICULTURAL DEVELOPMENT BOARD

Now with regard to the Agricultural Development Board, it is common criticism that the Board should be more generous with its borrowers and even reduce the rate of interest. The Provincial Savings Offices accept deposits from the public at 3%, and turn the funds over to the Province at 4%. The administration cost is taken out of that 1%, and the Savings Offices have now \$260,000 as a reserve. The Treasury receives the funds from the Savings Offices, pays them 4%, and lends to the Agricultural Development Board at 41/2%. Some say that it is costing nothing to transfer this money to the Agricultural Development Board, but I want to point out that we have set up a rate stabilization fund, and the Treasury

has built up a reserve of \$488,000 out of that spread of onehalf of 1%. The deposits in the Provincial Savings Offices at October last amounted to \$23,709,000 and the Treasury has lent to the Agricultural Board \$43,700,000. In other words, the Savings Offices do not provide us with funds sufficient for the needs of the Board. Consequently, we had to borrow in the open market some Twenty Millions of Dollars to take care of the needs of the Board, and out of this fund we had to take sufficient money to stabilize the rate as some of the money was costing more than  $4\frac{1}{2}\%$ . The Board carries on its activities with the 1% spread from  $4\frac{1}{2}\%$  to  $5\frac{1}{2}\%$ , and it has built up a reserve of \$759,000, and without advertising anything with regard to it, I think members of the House will appreciate that that \$759,000 will be needed under the conditions through which we are passing, and with the possibility of a good many farms coming on our hands on which the Board will not be able to realize the amount that was loaned against them.

18

# **PROVINCIAL HIGHWAYS**

Now, I have still some comparisons to make. In 1923 when the Ferguson administration took over the affairs of the Province, there were about 671 miles of roads in this Province that were classed as better than gravel roads. In 1932 when we closed the books we had of all types of road better than gravel, no less than 2,479 miles. This is an increase of road mileage in both the Departments of Northern Development and Highways, of 1,800 miles of some type of improved roads during the last nine years, or an average of 200 miles a year. We are sometimes criticized because we have spent money on roads, and then we are criticized for levying on the motor car. Let me in a brief way show what the motorist is getting out of this Province. I learn from the Iowa State College, which has been making a study of the value of improved roads, that an improved road means a saving of two cents a mile in the operation of a motor car. We had approximately last year \$20,000,000 of income from motorists of one type or another. There are about one-half a million motor cars in the Province, let us say. The average car, therefore, pays \$40 in various taxes. Let us assume that the motorist travels five thousand miles on the average. I

discussed that with the Motor League some years ago and they said it was nearer ten thousand miles. But let us take five thousand miles. At two cents a mile there is a saving of \$100. I doubt, Mr. Speaker, whether there is any investment in this Province that will as readily save \$60 for the investor.

#### **REVENUE FROM TOURISTS**

Good roads are also an inducement for tourists to visit the Province, although the money they spend does not really pass into the hands of the Provincial Treasurer, but it does benefit many classes of our citizens. During the period of eight years, there has been spent in this Province, at a conservative estimate, some \$809,000,000, or an average of \$100,000,000 a year, and yet some people criticize us for going into an investment in good roads.

#### THE RESEARCH FOUNDATION

19

Now with regard to the Research Foundation. This has been to the credit of Mr. Ferguson who, five years ago, before he left on a trip for England, started a campaign for an endowment to start the Foundation, and when he came back the problem was practically solved. Something over One and One-half Million Dollars had been subscribed, of which there has been paid up-to-date 93%. There is a great deal said with regard to this work being a duplication of that done at Ottawa. I do not believe it is. I have talked to some of the officials of the Ottawa Research Foundation and I think the work they are doing is not of as intimate a character as the work we are doing in our small organization across the Park under Dr. Speakman. If there is any definition of genius, it is a capacity for taking pains, and Dr. Speakman is an exemplification of that to the full. I want to say this for him: I think he is getting real results. I want to point out also this endowment fund is not the only source of revenue. The investments from the Endowment are producing something like 5.2%. However, every organization that comes to the Foundation seeking assistance is asked to put up some of the money, and we have an income from industrial corporations towards the Foundation which amounted in 1929 to \$12,000, in 1930 to \$22,500, in 1931 to \$30,214, and last

year to \$27,500. Various departments of the Government have submitted a good many problems, and the Departments pay for this service. The Foundation has made a valuable report on the lignite deposits in Northern Ontario. We are not going forward with this during present conditions, but I am quite satisfied that when normal times return we will get back to a development of that fuel because it has economic possibilities. The Agricultural Development Board has submitted to the Foundation the problem of the scourge of contagious abortions among cattle and that is being worked at in a way we think has solved the problem. There will be a leadership for the farmers of the Province and something that will enable them to get rid of this very serious menace.

#### T. & N. O. RAILWAY

The Province has advanced \$30,000,000 to the Temiskaming and Northern Ontario Railway. The Commission have themselves on debentures \$6,000,000 guaranteed by the Province and they have a loan with the Bank of \$6,650,000, which I presume they will turn into debentures and free themselves of the obligation to the Bank. There has been returned a good many dollars from the development of this road. It has not been locked on as a paying asset but one of a pioneer character, but it has had the capacity to pay a considerable amount of money to us. Over and above taking care of the interest on its debentures, the Temiskaming and Northern Ontario Railway has paid back to the Province over \$15,000,000. For example, the Railway paid to the Province in 1930 \$850,000, or 2.8% of the money we had advanced; in 1931 it paid the same, and in 1932 it was able to turn in \$400,000, so that we have made real progress in the development of this road. This colonization railway is a credit to the Province, a great asset to the north and a great asset to Canada, and it will, I am sure, amply justify the foresight and courage of those who designed it and those who followed it up, one Government after another, recognizing its possibility, and the backing it had with the people of the Province.

20

## HYDRO-ELECTRIC POWER COMMISSION

Now, with regard to Hydro—this seems to be a matter of major controversy.

In 1923 the peaks in the Hydro were 669,080 H.P. In 1931 it had mounted to 1,411,671 H.P. In 1932 it dropped to 1,289,267 H.P. This includes the contractual obligations and Dominion Power, which contributed to the grand total. In 1931 there was delivered to the people of the Province as peak load, 1,316,414 H.P., and the peak in 1932, in spite of conditions, was 1,116,947 H.P. The municipalities in the organization in 1923 were 593; in 1931, 721; and last Fall, 747. The pole mileage, including high tension and telephone, in 1923 was 2,804 miles, in 1931, 15,026, and in 1932, 15,771. Rural customers in 1923 were 7,757, with 605 miles. In 1931 55,601, with 8,214 miles; in 1932, 59,534, with 8,918 miles. This all shows the healthy condition in which Hydro is, and is an indication of the interest of the people of the Province. They are even signing up to have the service under the present difficult conditions.

I want to say this in leaving Hydro:—I doubt if there is any corporation in Canada at the present time that can show results such as those of the Ontario Hydro-Electric Power Commission. I want to say to my honourable friends opposite that ninety-five per cent. of the people of this Province believe in it.

22

MR. NIXON: "We all believe in Hydro."

MR. HENRY: "You do not show evidence of it at times."

MR. NIXON: "I do not believe in some phases of the administration right now."

#### THE BUDGET COMMITTEE

MR. HENRY: Now a few words as to the future. We have been working strenuously to cut down expenditure and I showed in the earlier part of my address that we had saved a matter of \$4,500,000 in ordinary expenditure in 1932 over 1931, but we are not satisfied with that and still purpose carrying on and cutting down expenditures for the present year.

You have all known of what is termed "the Treasury Board." That has been a sub-committee of the Cabinet, consisting of the Treasurer, the Attorney-General, and Prime Minister, with authority to approve and increase the expenditure of any one vote. To the credit of the Honourable Mr. Dunlop last fall, when he was getting accounts settled for the year, and thinking of the future, he recommended to the

Government that we set up what we call a Budgeting Committee, an organization that would go intimately and carefully into accounts of all the Departments and see that every economy was practised. This Committee is composed of the Treasury Board; the Assistant Provincial Treasurer, Mr. Turnbull; the Controller of Revenue, Mr. White; the Auditor, Mr. Brown; the Civil Service Commissioner, Mr. McCutcheon; and Colonel H. D. Lockhart Gordon, who was brought in from outside as an Accountant and a man peculiarly well versed and experienced in this type of work. Colonel Gordon, during this last year or so, has been engaged in advising Corporations how to cut down expenditures and make economies, and we were very fortunate when we were able to get him to sit in and become more or less the controlling genius in our economy proposals. It stands to Mr. Dunlop's credit that he advised the use of this Committee and we have been functioning, leaving it largely to Colonel Gordon and officials of the Departments to work out the details. We have had a very considerable success, but I want to say that even that has not satisfied us and the Committee will continue its work this year, seeking to make economies and cut out duplication of services.

# SUPPLEMENTARY ESTIMATES

In presenting the forecast of the year, I want to draw your attention to the first page of the Supplementary Estimates now before you. These Supplementary Estimates are unique in all history. I want to draw to your attention the summary on the fly leaf, pointing out that there have been deductions from the main estimates of \$3,715,000, and there are additions of \$4,925,000. I want to point out to you that one item, No. 4, the Hydro Electric Power Commission, which is capital advances to Hydro, amounts to \$1,225,000, and if that were eliminated from the estimates, there would in effect, be no Supplementary Estimates at all,-the deductions would eliminate the additions. The net result of this document I hold in my hand, cutting out the capital advances to the Commission, is that these estimates do not amount to anything but are a reduction of what the estimates were twelve months ago.

#### FORECAST FOR 1933

Now, with regard to the ordinary estimated receipts, I want to point out that we should have received from the Agricultural Development Board \$1,900,000 in interest due us, but we have been candid with the House, and I think are candid with the country when we say we have not been forcing farmers to pay up their indebtedness, and are estimating to be short of an amount of One Million Dollars. The Public Debt charges are on the increase because we have been borrowing money yearly. The House should appreciate that in 1932 there was expended on capital account \$35,800,000. The necessary borrowing increases the amount of interest we have to provide for. This year we have cut our net capital expenditure down to Twenty-one Million Dollars or Fourteen Million Dollars less than 1932, showing that we are retrenching and seeking to keep within bounds. There must, of course, be some capital expenditure for Hydro, and the municipalities do not wish to shut down absolutely on the construction of roads.

Now out of our expenditure of Fifty-three Million Dollars, there has to go as Debt Charges, \$18,335,000. Of that \$17,135,000 is for interest and \$1,200,000 for exchange. That is earmarked for debt and must be met. Yet people argue we should cut expenditure in one-half when over one-third of it is in fixed or uncontrollable charges that we cannot interfere with at all.

Now we do not desire as an administration to allow the Agricultural Development Board to go on indefinitely increasing its lendings, and consequently we have instructed the Board that we will not allow the total advances to go beyond Fifty Millions of Dollars. I think that is a fair figure. There will be an income in return of principal which will mean a revolving of funds on which we can work. I do not think it a healthy condition to go on indefinitely piling up a large debt in this column,—where loans go over a long period I have always discouraged it. My honourable friends will remember that I felt the setting up of a loan on a twenty-year amortization plan was not suitable in this country. I thought shorter date loans would have been better and would have encouraged the borrower to cut down and not drag on for a long time. It is not a healthy condition that we should be

loaning money on a twenty-year basis, especially when it is borrowed from the banks and subject to recall at short notice.

# **DEFICIT FOR 1933**

We will have an estimated deficit of \$2,900,000 for 1933. In relation to that, I want again to emphasize that One Million of that is there because we gave consideration to the farmer. Under the existing economic emergency I felt that we were fully justified in allowing a reasonable latitude to the farmers as to the strict terms of their obligations. It is not a matter of moratorium but is a consideration extended by the Minister in charge. Consequently, I think we are justified in bringing down a statement that shows a moderate deficit, particularly when over one-third of it is caused by the attitude we have taken with regard to those on the land who find themselves in difficulty.

#### SUCCESSION DUTIES SURTAX

I am pleased to be able to announce that we have no new taxes. We feel that it is not fitting until some years hence when things are more prosperous than they are to-day that we should pay off these deficits in short loans, rather than seek to collect from the people at the present time, living, as many of them are, under trying circumstances. Consequently, I do not feel I have to apologize for not bringing down any new taxes except that we propose to impose on Succession Duties a surtax of 10% to continue only so long as present conditions maintain.

#### CONCLUSION

While we are passing through trials and difficulties we recognize we are not responsible for the conditions that are world-wide, but that we live to-day in an economic world that practically covers the four quarters of the globe, and what is news to-day anywhere is news in the rest of the world to-morrow. This, after all, is a post-war condition. Those who care to study history will know that after the great wars of the past there has always been an unsettlement of economic conditions. In the period following the Napoleonic wars when Europe and England were staggering under the weight

of debt, for years they could not see any light but eventually they came through, and we will come through again to-day.

I am proud to feel that I am representing as Prime Minister, and for the afternoon, as Provincial Treasurer, the people of this Province, who are of such capacity, such courage, and with such confidence in themselves, with such stability of character and faith in our institutions, and all the qualities that go to make up a great people. Consequently, I leave this statement with you and with the people of the Province, with the confidence that business conditions will before long improve. Considering the events which recently have happened in the United States, the steady improvement of conditions in Great Britain, where there are signs she is taking her old commanding position in world affairs, the tendency of a betterment so far as agricultural products are concerned and the assistance that is promised from Ottawa; bearing in mind all these things, I am confident that there will soon be an emergence from this depression. History, we are told, repeats itself, and there is everything in history to show us that we will eventually emerge triumphantly as we have done in the past.

I move, Mr. Speaker, that you do now leave the Chair, and the House resolve itself into Committee of Supply.

First test and and and the state that the first the second in other these
